Fractions of Shapes and Collections

Year 3 Mathematics | Aussie Primary Academy

Name: ______________________________ Date: ___________________

ACARA v9.0: AC9M3N05 - recognise and represent unit fractions and their multiples in different ways.

Supporting: AC9M3N01 - use number understanding to compare and describe quantities.

Learning Intention

I can recognise, name and represent fractions of shapes and collections.

Strategy Box

Check how many equal parts there are. Count how many parts are shaded or selected. Fractions must use equal parts.

Worked Example

If a rectangle is split into 4 equal parts and 3 parts are shaded, the fraction shaded is 3/4.

A. Warm Up

1. Write the fraction: 1 out of 2 equal parts is shaded. ____
2. Circle the larger fraction: 1/2 or 1/4
3. Complete: 3/3 means ____ whole.

B. Build Your Skills

1. A pizza is cut into 8 equal slices. Zara eats 3 slices. What fraction did Zara eat? ____
2. There are 12 counters. Circle 1/3 of them. How many counters should be circled? ____
3. Draw a shape split into 4 equal parts. Shade 2 parts. Fraction shaded: ____

C. Strong Challenge

1. Explain why 1/2 of a large cake can be bigger than 1/2 of a small cupcake. ____

____

I Can Checklist

□ I can identify equal parts.

□ I can write a fraction.

□ I can explain a fraction idea.

★ **High Five!**

You showed careful fraction thinking - High Five!

Parent Tip - At Home

Cut toast, fruit or paper sandwiches into equal parts. Make it funny: "Can the teddy have exactly one quarter, or is teddy being cheeky?"

Teacher Tip - In Class

Show non-examples. Draw unequal parts and ask students why they are not fair fractions.

Fractions of Shapes and Collections - Answer Key

Year 3 Mathematics | Teacher Notes

Name: ______________________________ Date: ___________________

ACARA v9.0: AC9M3N05 - recognise and represent unit fractions and their multiples in different ways.

Supporting: AC9M3N01 - use number understanding to compare and describe quantities.

Answer Key

Warm Up: 1) 1/2. 2) 1/2. 3) one whole.

Build: 1) 3/8. 2) 4 counters. 3) Drawing should show 2/4 or equivalent 1/2.

Strong Challenge: Answers should explain that the whole matters; equal fractions of different-sized wholes can be different amounts.

Parent/Teacher Extension

Ask students to find fractions in the classroom: windows, shelves, pencils or groups of counters.
