Recognising Right Angles

Year 4 · Mathematics · Measurement | A2 · Learn + Notice

Name: _____ Date: _____

LEARNING INTENTION

I can recognise right angles in different positions.

KEY IDEA

A right angle is one quarter of a full turn. It matches a square corner and measures 90°.

VOCABULARY

right angle · quarter turn · vertex · arms

LEARN IT: A Worked Model

Compare the opening with the corner of a rectangular piece of paper. Rotate the paper to align one edge with an arm.

90°

Use the marked opening. Diagrams for calculation tasks are not drawn to scale.

SUCCESS CRITERIA

- ☐ I can recognise right angles in different positions.
- ☐ I can explain the benchmark, tool or angle rule I used.
- ☐ I can check my answer and correct a mistake.

NOTICE IT: Guided Practice

Write YES if the marked angle is right. Write NO if it is not. Use a square corner.

A.

Answer: _____

B.

Answer: _____

C.

Answer: _____

Recognising Right Angles

Year 4 · Mathematics · Measurement | A2 · Practise + Apply + Reason

PRACTISE IT: Independent Questions

Write YES if the marked angle is right. Write NO if it is not. Use a square corner.

A.

Answer: _____

B.

Answer: _____

C.

Answer: _____

D.

Answer: _____

E.

Answer: _____

F.

Answer: _____

APPLY IT

Draw a rectangle. Mark its four right angles with small square symbols.

EXPLAIN HOW YOU KNOW: Misconception Check

Leo says a tilted square has no right angles. Explain his mistake.

CHALLENGE: Reasoning Task

Can two acute angles join to make a right angle? Draw one possible example.

MY SELF-REVIEW

Circle one: I understand it / I need more practice / I need help

Recognising Right Angles

Year 4 · Mathematics · Measurement | A2 · Teacher Copy

ANSWER KEY: Guided + Independent Practice

Notice: A YES; B NO; C YES.

Practice: A YES; B NO; C NO; D YES; E NO; F YES.

Apply: four square corner markings.

Reason: rotating a square preserves every opening.

Challenge: yes, for example two 45° openings make 90°.

COMMON MISCONCEPTION

A right angle remains right when the whole diagram is rotated. Use a paper corner to check the opening.

TEACHER PROMPT

Ask: "Which opening are you using? What benchmark or angle relationship applies? How can you check your answer?"

NEXT-STEP GUIDANCE

Move to recognising obtuse angles.

PRINTING AND ASSESSMENT

Print A4 at actual size. Use a square corner to compare openings. Students do not need a protractor for recognition tasks.
