LEARNING INTENTION & WORKED MODEL

I can apply scientific inquiry and reasoning to plan, evaluate or communicate evidence. Model: make a clear claim, cite relevant evidence, then explain the link.

A. DECISION

Identify scientific evidence relevant to a water-use decision.

B. STAKEHOLDERS

List three groups who may hold different priorities.

C. EVIDENCE

Separate a scientific claim from a personal preference.

D. TRADE-OFF

Explain one benefit and one cost of a proposed solution.

Science Knowledge & Community Decisions

Page 2 of 3

Name: _____

Date: _____

E. UNCERTAINTY

Why might evidence not produce one automatic decision?

F. COMMUNICATE

Write a balanced recommendation for a council.

G. UPDATE

What should happen if new evidence appears?

H. CHALLENGE

Create a decision matrix using evidence, cost and community impact.

MY LEARNING REVIEW

- ☐ I used evidence or calculations.
- ☐ I explained my reasoning clearly.
- ☐ I checked and improved my work.

The hardest part was: _____

PARENT/CARER TIP

Ask the student to point to the evidence behind every scientific decision.

ANSWER KEY & TEACHER SUPPORT

A

E.g. rainfall, storage, demand and ecosystem data.

B

Residents, Traditional Owners, farmers, scientists, council.

C

Claim must be testable/evidence-based; preference expresses value.

D

One plausible benefit and cost.

E

Values, uncertainty and competing needs also matter.

F

Recommendation cites evidence and acknowledges trade-offs.

G

Review and revise the decision transparently.

H

Matrix uses clear criteria and justified ratings.

ASSESSMENT NOTES

Record whether the student worked independently, used the model, justified decisions and checked accuracy. Re-teach one misconception before extension.
