

Name: _____

Date: _____

LEARNING TARGET

I can determine word meanings using context, roots, affixes, and reference tools.

KEY STRATEGY + WORKED EXAMPLE

Analyze meaningful parts, locate context clues, propose a meaning, and verify it in the full sentence.

The biologist inspected the translucent wing; light passed through it, but tiny veins remained visible. Root clues: bio=life, trans=across, luc=light.

A. TRY TOGETHER - USE THE STRATEGY

1. Name the skill in today's learning target.
2. Underline the words in the model or source that matter most.
3. State the first step of the strategy.
4. Explain what a complete answer must include.

B. CORE PRACTICE - SHOW YOUR WORK

5. Identify the meaning of unfamiliar words in the source or model.

6. Explain its job or meaning in context.

7. Find or create a second accurate example.

8. Label the important word, phrase, or clause.

9. Write a non-example.

10. Correct the non-example.

11. Use the skill in a complete original sentence.

12. Explain how the skill improves meaning, clarity, or style.

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. Write one correct example.

14. Label the target feature.

15. Write a different example.

16. Revise it to create a different effect.

17. Edit one sentence containing an error.

18. Explain the correction with a rule.

19. Check punctuation and spelling in an earlier answer.

20. Write a rule a classmate could follow.

Name: _____

Date: _____

D. APPLY THE SKILL

21. Complete a full meaning of unfamiliar words response using at least two details from the source.

22. Evaluate which evidence is strongest for the meaning of unfamiliar words and justify your choice.

23. Create a new example that uses the same skill, then explain it.

E. REASON, CHECK AND CORRECT

24. Explain why this strategy works and when it is useful.

25. Describe a likely mistake and show how to correct it.

EXIT TICKET + CHALLENGE

26. Apply context clues, roots, and affixes to a new example and explain your evidence or rule.

Challenge: Create a rigorous example of context clues, roots, and affixes, complete it, and justify every decision.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

- A. 1) Skill correctly named. 2) Relevant words identified. 3-4) Answers vary; require the stated strategy and complete-response criteria.
- B. 5) Translucent / biologist. 6) Some light passes through / scientist of living things. 7) Answers vary. 8) Parts labeled accurately. 9-10) Non-example corrected. 11) Correct contextual use. 12) Word parts and context improve precision.
- C. 13-20) Answers vary. Require an accurate meaning of unfamiliar words, relevant evidence or rule, clear explanation, and correct conventions.
- D. 21) Complete response with two relevant details. 22) Strongest evidence should be specific and directly support the meaning of unfamiliar words: 'light passed through it' supports translucent; bio supports biologist. 23) New example varies but must transfer the same skill.
- E. 24-25) Answers vary. Require precise reasoning and a corrected example supported by the text or rule.
- EXIT. 26) Teacher checks independent transfer, evidence/rule, explanation, and conventions.
- Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.
- F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may split by letters rather than meaningful parts. Verify every proposed meaning in context.

TEACHER CHECK

- ☐ Uses an appropriate Grade 5 ELA strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. Have them point to the text evidence or language rule, then revise one response aloud.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
