

ACARA V9.0 · AC9M2N06 — Solve practical problems involving money transactions

Learning Intention

I can recognise Australian coins and add simple amounts of money.

Warm-Up

Look at the coins below.

$10c + 10c = \underline{\hspace{2cm}}$ cents

1. Lolly Shop

A lolly costs 20c. You pay with a 50c coin.

How much change do you get?

.....

2. Piggy Bank

You have 3 x \$1 coins and 2 x 50c coins.

How much money do you have?

.....

3. Ice Cream

An ice cream costs \$2. You have \$5.

How much money is left?

.....

4. Saving Up

You save \$2 each week for 3 weeks.

How much have you saved?

.....

High Five Self-Check

Colour a star for each problem you solved on your own.

Extension Activity

Set up a pretend shop at home with 5 items under \$5 and practise giving change.

Parent / Teacher Tip

Real coins work best — let your child sort, count, and physically hand over 'payment' during pretend play. This builds real-world money confidence fast.

Answers & Marking Guide

Warm-Up

20 cents ($10c + 10c = 20c$)

Main Problems

1. **Lolly Shop:** 30c change ($50c - 20c = 30c$)

2. **Piggy Bank:** \$4.00 ($\$3 + \$1 = \4)

3. **Ice Cream:** \$3 left ($\$5 - \$2 = \3)

4. **Saving Up:** \$6 ($2 + 2 + 2 = 6$)

Marking Tip

Check working, not just the final figure — a child who shows $\$2 + \$2 + \$2$ understands the concept even with a small arithmetic slip.
