

Multiplication Equal Groups

Year 2 Mathematics | ACARA Final APA Version

Name: _____

Date: _____

ACARA v9.0: AC9M2N05 - multiply and divide by one-digit numbers using repeated addition, equal grouping, arrays and partitioning. Supporting: AC9M2N04 - represent problems using number sentences.

Learning Intention

I can make equal groups and write a multiplication sentence.

Strategy Box

Multiplication can mean equal groups. Count the groups, count how many are in each group, then find the total.

3 groups of 4 = 12

Worked Example

There are 4 equal groups with 3 counters in each group.

Repeated addition: $3 + 3 + 3 + 3 = 12$

Multiplication: $4 \times 3 = 12$

A. Warm Up

Start strong! Count the equal groups.

1. 2 groups of 5 = _____

2. 3 groups of 2 = _____

3. 4 groups of 4 = _____

Multiplication Equal Groups

Year 2 Mathematics | Build, Think and Explain

Name: _____

Date: _____

ACARA v9.0: AC9M2N05 - multiply and divide by one-digit numbers using repeated addition, equal grouping, arrays and partitioning. Supporting: AC9M2N04 - represent problems using number sentences.

B. Build Your Skills

Great thinking! Write the repeated addition and multiplication sentence.

1. 3 groups of 5

Repeated addition: _____

Multiplication: _____

2. 5 groups of 2

Repeated addition: _____

Multiplication: _____

3. 4 groups of 6

Repeated addition: _____

Multiplication: _____

4. 6 groups of 3

Repeated addition: _____

C. Word Problem

A teacher puts 4 pencils on each table. There are 5 tables. How many pencils are there altogether? Show your strategy.

D. Maths Challenge

Think like a mathematician. Draw two different equal-group pictures that both have a total of 18.

I Can Checklist

- ☐ I can make equal groups.
- ☐ I can use repeated addition.
- ☐ I can write a multiplication sentence.

Teacher Feedback

Multiplication Equal Groups - Answer Key

Year 2 Mathematics | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9M2N05 - multiply and divide by one-digit numbers using repeated addition, equal grouping, arrays and partitioning. Supporting: AC9M2N04 - represent problems using number sentences.

Answer Key

A. Warm Up: 1) 10. 2) 6. 3) 16.

B. Build Your Skills: 1) $5 + 5 + 5 = 15$; $3 \times 5 = 15$. 2) $2 + 2 + 2 + 2 + 2 = 10$; $5 \times 2 = 10$. 3) $6 + 6 + 6 + 6 = 24$; $4 \times 6 = 24$. 4) $3 + 3 + 3 + 3 + 3 + 3 = 18$; $6 \times 3 = 18$.

C. Word Problem: 5 tables with 4 pencils on each table gives 20 pencils. $5 \times 4 = 20$.

D. Maths Challenge: Answers will vary. Examples: 3 groups of 6 and 2 groups of 9.

Parent/Teacher Tip

Use real objects such as counters, blocks or pencils. Ask children to build equal groups before writing the number sentence.

Extension Idea

Choose a total number less than 30. Make as many different equal-group pictures as you can.
