

Name: _____

Date: _____

Australian Curriculum v9.0 Aligned | AC9MFM01

LEARNING INTENTION

I am learning to compare objects by length, mass, capacity and duration.

WARM UP — LOOK AROUND!

Find something longer than your hand and something shorter than your pencil. Write them in the big boxes.

Longer than my hand: _____

Shorter than my pencil: _____

A — COMPARE LENGTH

Circle the LONGER object in each pair:

A: a pencil B: a paperclip

Longer: _____

A: a snake B: a caterpillar

Longer: _____

A: a bus B: a car

Longer: _____

B — MASS AND CAPACITY

Circle the correct answer:

A teddy bear vs a big rock. Which is heavier?

☐ teddy

☐ rock

A small cup vs a big bucket. Which holds more?

☐ cup

☐ bucket

C — DURATION

Tick the activity that takes LONGER:

☐ Blinking your eye ☐ Eating your lunch

☐ Brushing teeth ☐ Reading a whole book

D — ORDER BY LENGTH

Number 1 (shortest) to 3 (longest) in the big boxes:

an ant

a crocodile

a dog

FUN REAL-LIFE ACTIVITY

Measure with Hands! Use hand spans to measure objects at home — a table, a book, a pillow. Which is longest?

STUDENT REFLECTION

☐ I can compare length (longer/shorter)

☐ I can compare mass (heavier/lighter)

☐ I can compare duration (longer/shorter time)

TEACHER FEEDBACK

TIPS

Parent: Compare objects at home. Ask: 'Which is heavier?' when unpacking shopping. Use hands to measure length.

Teacher: Set up a measurement station with balance scales and containers. Students compare and record using drawings.
