Australian Curriculum v9.0 Aligned | AC9MFN04

LEARNING INTENTION

I am learning to split numbers into two parts and combine them back together.

WARM UP — MAKING 5!

Write two numbers that add up to 5 in each pair of big boxes.

$$\underline{\quad\quad} + \underline{\quad\quad} = 5$$

$$\underline{\quad\quad} + \underline{\quad\quad} = 5$$

$$\underline{\quad\quad} + \underline{\quad\quad} = 5$$

A — FIND THE MISSING PART

Find the missing part. Write it in the big box:

$$\text{Whole: } 8 = 3 + \underline{\quad\quad}$$

$$\text{Whole: } 10 = 6 + \underline{\quad\quad}$$

$$\text{Whole: } 7 = \underline{\quad\quad} + 4$$

B — TEN FRAME

Colour some squares. Write the two parts that make 10:

$$\text{Purple: } 5 + \text{White: } \underline{\quad\quad} = 10$$

Colour your own and write: $\underline{\quad\quad} + \underline{\quad\quad} = 10$

C — NUMBER BONDS TO 7

Complete all bonds to 7:

$$0 + \underline{\quad\quad} = 7$$

$$2 + \underline{\quad\quad} = 7$$

$$5 + \underline{\quad\quad} = 7$$

D — WAYS TO MAKE 9

Find 3 different ways to make 9:

$$\underline{\quad\quad} + \underline{\quad\quad} = 9$$

$$\underline{\quad\quad} + \underline{\quad\quad} = 9$$

$$\underline{\quad\quad} + \underline{\quad\quad} = 9$$

FUN REAL-LIFE ACTIVITY

Snap! Use 10 blocks in two colours. Snap into two groups and say: '4 and 6 make 10!' Keep snapping to find new ways.

STUDENT REFLECTION

[] I can split a number into two parts

[] I can make numbers in different ways

[] I know my number bonds to 10

TEACHER FEEDBACK

TIPS

Parent: Use 10 small objects. Split them into two piles and ask: 'How many in each pile?' Repeat daily!

Teacher: Use two-colour counters and part-part-whole
