

LEARN IT - MODEL AND NOTICE

Living things grow and change through life-cycle stages. Offspring are similar to their parents but are not exact copies.

Remember: Sequence observable stages and compare features.

A. GUIDED PRACTICE

1. Put egg, caterpillar, butterfly in order.

2. Name one similarity between parent and young.

3. Name one difference.

B. INDEPENDENT PRACTICE

1. Sequence a frog life cycle.

2. Identify an adult stage.

3. Compare seedling and plant.

4. Explain offspring.

5. Draw arrows to show a repeating cycle.

C. CHECKPOINT CHALLENGE

Create and label a four-stage life cycle with one change at each stage.

Life Cycle Stages

Australian Curriculum v9 | AC9S2U01

D. APPLY IT

Compare a young and adult animal using a two-column record of similarities and differences.

My answer / plan:

My evidence / explanation:

E. EXPLAIN YOUR THINKING

1. Which features changed?

2. Why is a life cycle shown with arrows?

MY LEARNING REVIEW

☐ I can do it.

☐ I need a little help.

☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Use photos in random order and ask the child to justify the sequence.

Life Cycle Stages

Australian Curriculum v9 | AC9S2U01

COMPLETE ANSWER GUIDE

Guided	Egg-caterpillar-butterfly; inherited/shared feature; differences vary.
Practice	Correct familiar sequence; offspring are young living things.
Challenge	Four accurate stages and changes.
Application	Valid observable similarities/differences.

TEACHER NOTES - WHAT TO NOTICE

Success evidence: Sequences life stages and compares parents with offspring.

Common difficulty: Treating growth as simply becoming larger.

Next step: Compare life cycles of two different living things.

QUICK CONFERENCE RECORD

☐ Secure

☐ Developing

☐ Re-teach
