

Measure, Record and Sort Data

Australian Curriculum v9 | AC9S2I03 / AC9S2I04

LEARN IT - MODEL AND NOTICE

Scientists make observations, use informal measurements or suitable tools, record results and sort or order data to reveal patterns.

Remember: Record actual results with units and clear labels.

A. GUIDED PRACTICE

1. Which is an observation?

2. Choose a unit for toy-car distance.

3. Why label a table?

B. INDEPENDENT PRACTICE

1. Record three results.

2. Order values smallest to largest.

3. Sort objects by one property.

4. Choose a table heading.

5. Identify a simple pattern.

C. CHECKPOINT CHALLENGE

Create a results table with trial, observation and measurement columns.

Measure, Record and Sort Data

Australian Curriculum v9 | AC9S2I03 / AC9S2I04

D. APPLY IT

Results are 3, 5 and 7 blocks. Represent, order and describe the pattern.

My answer / plan:

My evidence / explanation:

E. EXPLAIN YOUR THINKING

1. Which value is greatest?

2. What makes the record easy to understand?

MY LEARNING REVIEW

☐ I can do it.

☐ I need a little help.

☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Let the child enter results immediately, including unexpected ones.

Measure, Record and Sort Data

Australian Curriculum v9 | AC9S2I03 / AC9S2I04

COMPLETE ANSWER GUIDE

Guided	Observable statement; blocks/cm; labels explain data.
Practice	Accurate records, order, categories, headings and pattern.
Challenge	Complete labelled table.
Application	3,5,7; increase by 2; 7 greatest.

TEACHER NOTES - WHAT TO NOTICE

Success evidence: Records, organises and represents observations/data clearly.

Common difficulty: Recording predictions as if they were results.

Next step: Repeat measurements and discuss variation.

QUICK CONFERENCE RECORD

☐ Secure ☐ Developing ☐ Re-teach
