

Sound Energy and Vibration

Australian Curriculum v9 | AC9S2U02

LEARN IT - MODEL AND NOTICE

Sound is energy we can hear and sometimes feel. Vibrating objects produce sound, and stopping vibration can stop the sound.

Remember: Look, listen and safely feel for evidence of vibration.

A. GUIDED PRACTICE

1. What produces sound: vibration or colour?

2. Name one vibrating instrument part.

3. What may happen when vibration stops?

B. INDEPENDENT PRACTICE

1. Observe a plucked rubber band.

2. Explain a humming throat feeling.

3. Name a sound source.

4. Circle heard/felt evidence.

5. Write one safety rule.

C. CHECKPOINT CHALLENGE

Draw a sound source and label what vibrates.

Sound Energy and Vibration

Australian Curriculum v9 | AC9S2U02

D. APPLY IT

With an adult, gently pluck a stretched rubber band over a container. Observe sound and movement without placing it near the face.

My answer / plan:

My evidence / explanation:

E. EXPLAIN YOUR THINKING

1. What evidence showed vibration?

2. How were sound and movement connected?

MY LEARNING REVIEW

☐ I can do it.

☐ I need a little help.

☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Use quiet household sound sources and protect hearing by avoiding loud or close sounds.

Sound Energy and Vibration

Australian Curriculum v9 | AC9S2U02

COMPLETE ANSWER GUIDE

Guided	Vibration; string/drum skin/reed; sound stops.
Practice	Rubber band moves; throat vibrates; examples vary; safe distance/volume.
Challenge	Accurate source and vibrating part.
Application	Visible movement and heard sound occur together.

TEACHER NOTES - WHAT TO NOTICE

Success evidence: Links sound production with observable vibration.

Common difficulty: Naming the whole object without identifying the vibrating part.

Next step: Change vibration safely and compare sounds.

QUICK CONFERENCE RECORD

☐ Secure ☐ Developing ☐ Re-teach
