

Changing Sounds

Australian Curriculum v9 | AC9S2U02

LEARN IT - MODEL AND NOTICE

Different actions can change sounds. Faster vibrations often produce higher pitch; stronger actions often produce louder sounds.

Remember: Pitch means high/low; volume means loud/soft.

A. GUIDED PRACTICE

1. Which word describes loudness?

2. Which word describes high or low sound?

3. Predict a gentle tap sound.

B. INDEPENDENT PRACTICE

1. Compare gentle and strong taps.

2. Compare short and long rubber bands.

3. Sort words into pitch/volume.

4. Write one fair-test rule.

5. Record one observation.

C. CHECKPOINT CHALLENGE

Plan a test changing one action to make a different sound.

Changing Sounds

Australian Curriculum v9 | AC9S2U02

D. APPLY IT

Test three safe taps on the same object: gentle, medium and firm, never loud enough to hurt ears. Record volume pattern.

My answer / plan:

My evidence / explanation:

E. EXPLAIN YOUR THINKING

1. What was changed?

2. What was kept the same?

MY LEARNING REVIEW

☐ I can do it.

☐ I need a little help.

☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Practise saying high/low for pitch and loud/soft for volume during safe sound play.

Changing Sounds

Australian Curriculum v9 | AC9S2U02

COMPLETE ANSWER GUIDE

Guided	Volume;pitch;soft/quiet.
Practice	Strong often louder; shorter often higher; sorting correct; keep source/tool same.
Challenge	One-variable safe test.
Application	Expected volume increases with tap strength; evidence may vary.

TEACHER NOTES - WHAT TO NOTICE

Success evidence: Describes sound using pitch/volume and links changes to actions.

Common difficulty: Using high to mean loud.

Next step: Investigate pitch while keeping action strength similar.
