Year 1 Maths - Equal Groups and Skip Counting

Australian Curriculum v9 | AC9M1N03

LEARN IT - look, say and notice

Model: 4 groups of 2 make 8. Count 2, 4, 6, 8. Equal groups have the same number in every group.

Remember: Check that each group is equal before skip counting.

A. TRY IT TOGETHER

1. Three groups have 2 dots each. How many dots?

2. Continue by 5s: 5, 10, __, __.

3. Circle the equal grouping: 3,3,3 or 3,2,3.

B. MY PRACTICE

1. Count by 2s to 20.

2. Count by 10s to 100.

3. 5 groups of 2 = __.

4. 2 groups of 5 = __.

5. Draw 3 equal groups of 5.

C. I CAN DO IT

Draw and label two ways to make a total of 10 using equal groups.

Year 1 Maths - Equal Groups and Skip Counting

Australian Curriculum v9 | AC9M1N03

D. USE IT IN A REAL SITUATION

Ten socks are placed into equal pairs. Draw the groups, skip count and state how many pairs.

E. CHECK AND EXPLAIN

1. Why is 4,4,3 not an equal grouping?

2. Which is faster for 6 pairs: counting by ones or twos? Why?

MY LEARNING REVIEW

☐ I can do it. ☐ I need a little help. ☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Make equal groups with buttons. Ask “How many groups? How many in each? How many altogether?”

Year 1 Maths - Equal Groups and Skip Counting

Australian Curriculum v9 | AC9M1N03

COMPLETE ANSWER KEY

Guided	6; 15,20; 3,3,3.
Practice	2-20; 10-100; 10; 10; 15 objects in 3 groups.
Independent	Examples: 5 groups of 2 and 2 groups of 5.
Application	5 equal pairs; 2,4,6,8,10.

TEACHER NOTES - what to notice

Success evidence: Forms equal groups and skip counts by 2s, 5s or 10s to quantify.

Common difficulty: Counting groups rather than the objects in the groups.

Next step: Connect skip-count sequences to repeated addition.
