

Sort, Count and Picture Graph

AC9MFST01

Sort and count data shown as pictures

Name: _____

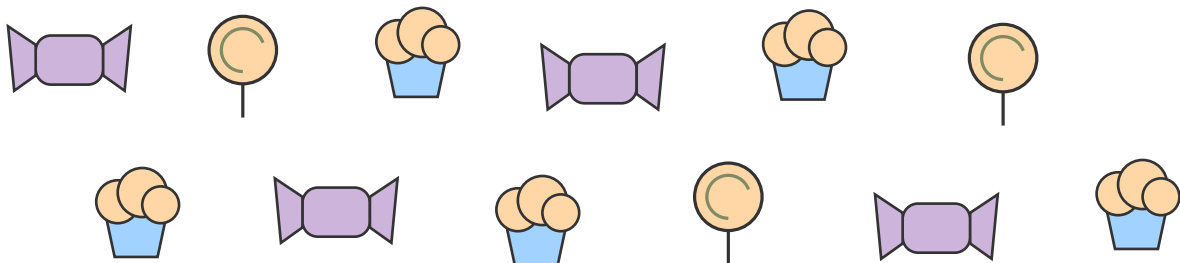

Date: _____

Our question

What kinds of treats are in the sweet shop display?

1. Look at the mixed treats

Find the candies, lollipops and cupcakes. Touch each picture as you count.

2. Sort and count

Complete the table. Draw one treat picture in each correct row, then write the total.

CANDIES

Draw one picture for each treat:

Total: _____

LOLLIPOPS

Draw one picture for each treat:

Total: _____

CUPCAKES

Draw one picture for each treat:

Total: _____

Check your sorting

Add the three totals. Do they make 12 treats altogether? YES / NOT YET

Sort, Count and Picture Graph

AC9MFST01

Make and read a one-picture-per-item graph

Name: _____

Date: _____

Key

Each treat picture stands for 1 treat.

3. Make a picture graph

Use your totals from page 1. Draw or colour one picture for each treat.

Picture graph title: **Treats in the Sweet Shop**

4. Compare the data

Which treat has the most? _____

Which treat has the fewest? _____

How many candies are there? _____

How many treats are there altogether? _____

5. Collect your own data

Ask 4 people: Do you like lollipops? Draw one face in YES or NO for each answer.

YES

NO

More people said: **YES** / **NO** / **THE SAME**

Answer key and parent/teacher support

Name: _____

Date: _____

Answer key

Page 1

1-2. Candies: 4. Lollipops: 3. Cupcakes: 5.

Children draw 4 candies, 3 lollipops and 5 cupcakes in the matching rows.

Check: $4 + 3 + 5$ makes 12 treats altogether. Circle YES.

Page 2

3. Picture graph: 4 candy pictures, 3 lollipop pictures and 5 cupcake pictures.

4. Most: cupcakes. Fewest: lollipops. Candies: 4. Altogether: 12.

5. Answers will vary. Check one face for each response and compare YES and NO.

Quick oral check

- What was our question?
- Which group had more?
- How does the graph show 1 treat?
- Can two groups have the same total?

Parent/Teacher Tip

Start with a real collection such as shapes, toys or counters. Ask one clear question, sort the objects into rows, count each row, then compare using more, fewer or the same. Keep one object matched to one picture.

I can...

- ☐ sort pictures into groups.
- ☐ make a one-to-one picture graph.
- ☐ count how many are in each group.
- ☐ compare groups using more or fewer.

Support Let children move real objects first. Extend by asking them to create their own question.
