

Name: _____

Date: _____

. Learning Intention

I can count simple collections of Australian coins.

. Mini Lesson

Count coins by their values, not by how many coins you see.

Group same coins first. Example: $10c + 10c + 5c = 25c$.

A. Count Same Coins

$$5c + 5c = \underline{\hspace{2cm}}$$

$$10c + 10c = \underline{\hspace{2cm}}$$

$$20c + 20c = \underline{\hspace{2cm}}$$

$$50c + 50c = \underline{\hspace{2cm}}$$

B. Count Mixed Coins

$$10c + 5c = \underline{\hspace{2cm}}$$

$$20c + 10c = \underline{\hspace{2cm}}$$

$$50c + 20c = \underline{\hspace{2cm}}$$

$$20c + 20c + 10c = \underline{\hspace{2cm}}$$

Date: _____

. Answer Key

A: 10c, 20c, 40c, \$1.

B: 15c, 30c, 70c, 50c.

C: Banana yes; sticker no.

D: Possible answers: 20c + 10c + 10c; 50c + 10c or 20c + 20c + 20c.

. Parent / Teacher Tip

Start with same coins before mixed coins. Coin values can be tricky because coin size and value do not always match.
