

Year 4 Maths - Area and Perimeter

Name: _____ Date: _____

ACARA v9.0 Target

AC9M4M01 - measure, compare and calculate perimeter and area of rectangles using appropriate units and strategies.

Learning Intention

I can find the perimeter and area of rectangles and explain the difference between them.

Maths Strategy

Perimeter is the distance around the outside. Area is the space inside. Use units carefully.

Worked Example

Example: A rectangle is 8 cm long and 3 cm wide. Perimeter = $8 + 3 + 8 + 3 = 22$ cm.
Area = $8 \times 3 = 24$ square cm.

Success Checklist

- ☐ I can find perimeter.
- ☐ I can find area.
- ☐ I can choose the correct unit.

Mini Practice

Draw a rectangle with an area of 24 square units. Label its side lengths.

Parent Quick Play

Make it real at home with coins, clocks, snacks, steps or prices. Keep the maths short, funny and low pressure.

Teacher Class Starter

Start with one modelled example. Ask students to explain the strategy before they calculate independently.

★ **Before you begin:** Read the example, say the strategy aloud, then try the mini practice. Mistakes are clues that help your brain grow.

Year 4 Maths - Area and Perimeter

Page 2 - Practice and problem solving

Warm Up

1. A square has sides of 5 cm. Perimeter = ____ cm
2. A rectangle is 6 cm by 4 cm. Area = ____ square cm
3. Circle the area unit: cm / square cm

Build Your Skills

1. A garden bed is 9 m long and 4 m wide. Find its perimeter and area.

2. A classroom rug is 7 m by 5 m. How much floor space does it cover?

3. Thomas says perimeter and area are always the same number. Use an example to show why this is not true.

Strong Challenge

Design two different rectangles with an area of 36 square units. Find the perimeter of each.

I Can Checklist

- ☐ I can calculate perimeter.
- ☐ I can calculate area.
- ☐ I can explain the difference.

Teacher Feedback

What went well:

Next step: _____

 **High Five!** You measured like a careful designer today. Your diagrams and units matter!

Year 4 Maths - Area and Perimeter - Answer Key

For teachers, parents and tutors

Detailed Answers

1. Warm Up: 20 cm; 24 square cm; square cm.
2. Garden: perimeter = 26 m; area = 36 square m.
3. Rug: $7 \times 5 = 35$ square m.
4. Perimeter and area are different ideas; for example 6 by 4 has perimeter 20 and area 24.
5. Challenge: Examples include 6×6 and 9×4 ; perimeters vary.

Parent Tip - At Home

Measure a table, book or mat together. Ask: Are we finding the edge around it or the space on top?

Teacher Tip - In Class

Colour the border for perimeter and shade the inside for area. This prevents students mixing the two concepts.

Extension Idea

Create a dream garden plan on grid paper. Label the area and perimeter of each rectangle.
