

Year 4 Maths - Multiplication and Division Facts

Name: _____ Date: _____

ACARA v9.0 Target

AC9M4N04 - use efficient strategies and known facts to solve multiplication and division problems with natural numbers.

Learning Intention

I can use multiplication facts and related division facts to solve problems efficiently.

Maths Strategy

Use fact families. If $7 \times 8 = 56$, then $56 \div 8 = 7$ and $56 \div 7 = 8$.

Worked Example

Example: 9 groups of 6 apples is $9 \times 6 = 54$. If 54 apples are shared into 9 groups, each group has 6 apples.

Success Checklist

- ☐ I can recall multiplication facts.
- ☐ I can connect multiplication and division.
- ☐ I can solve word problems using facts.

Mini Practice

Write the fact family for 6, 8 and 48.

Parent Quick Play

Make it real at home with coins, clocks, snacks, steps or prices. Keep the maths short, funny and low pressure.

Teacher Class Starter

Start with one modelled example. Ask students to explain the strategy before they calculate independently.

 **Before you begin:** Read the example, say the strategy aloud, then try the mini practice. Mistakes are clues that help your brain grow.

Year 4 Maths - Multiplication and Division Facts

Page 2 - Practice and problem solving

Warm Up

1. $7 \times 6 = \underline{\quad}$
2. $72 \div 8 = \underline{\quad}$
3. Fill the missing number: $9 \times \underline{\quad} = 108$

Build Your Skills

1. There are 8 trays with 9 muffins on each tray. How many muffins are there altogether?

2. A class has 84 counters. They are shared equally into 7 groups. How many counters are in each group?

3. Liam knows $6 \times 12 = 72$. How can this help him solve $72 \div 12$?

Strong Challenge

Create a two-step multiplication and division problem about a school fundraiser. Show both steps clearly.

I Can Checklist

- ☐ I can use multiplication facts.
- ☐ I can use related division facts.
- ☐ I can solve two-step problems.

Teacher Feedback

What went well:

Next step: _____

 **High Five!** You connected facts like a maths detective. That is powerful problem-solving!

Year 4 Maths - Multiplication and Division Facts - Answer Key

For teachers, parents and tutors

Detailed Answers

1. Warm Up: 42; 9; 12.
2. Muffins: $8 \times 9 = 72$ muffins.
3. Counters: $84 \div 7 = 12$ counters in each group.
4. Liam can use the related fact: if $6 \times 12 = 72$, then $72 \div 12 = 6$.
5. Challenge: Answers vary; look for two clear operations and correct working.

Parent Tip - At Home

Practise facts in funny bursts: ask three facts while setting the table, then swap roles and let your child quiz you.

Teacher Tip - In Class

Use arrays and fact-family triangles. Visuals help students see why multiplication and division are connected.

Extension Idea

Pick a tricky fact, such as 8×7 . Draw an array and write all four related facts.
