

Year 4 Maths - Place Value and Decimals

Name: _____ Date: _____

ACARA v9.0 Target

AC9M4N03 - connect fractions and decimals, including tenths and hundredths, and use place value to compare and represent numbers.

Learning Intention

I can use place value to read, compare and represent numbers with tenths and hundredths.

Maths Strategy

Look at each place value column carefully. Start with the whole number, then compare tenths, then hundredths.

Worked Example

Example: 4.36 has 4 ones, 3 tenths and 6 hundredths. It is greater than 4.29 because 3 tenths is greater than 2 tenths.

Success Checklist

- ☐ I can read tenths and hundredths.
- ☐ I can compare decimals.
- ☐ I can explain using place value words.

Mini Practice

Write the value of each digit in 5.72. Then write a number that is greater than 5.72 but less than 6.

Parent Quick Play

Make it real at home with coins, clocks, snacks, steps or prices. Keep the maths short, funny and low pressure.

Teacher Class Starter

Start with one modelled example. Ask students to explain the strategy before they calculate independently.

★ **Before you begin:** Read the example, say the strategy aloud, then try the mini practice. Mistakes are clues that help your brain grow.

Year 4 Maths - Place Value and Decimals

Page 2 - Practice and problem solving

Warm Up

1. Write 3.4 as 3 ones and ____ tenths.
2. Circle the greater number: 2.61 or 2.16
3. Write 7 ones, 8 tenths and 5 hundredths as a decimal: _____

Build Your Skills

1. Order these numbers from smallest to greatest: 4.7, 4.07, 4.70, 4.17.

2. Draw or describe a place value chart for 6.38. Label ones, tenths and hundredths.

3. Zara says 5.09 is greater than 5.7 because 9 is bigger than 7. Explain her mistake.

Strong Challenge

Create three decimals between 3.2 and 3.5. Explain how you know each one fits.

I Can Checklist

- ☐ I can compare decimals using place value.
- ☐ I can show tenths and hundredths.
- ☐ I can explain my maths thinking.

Teacher Feedback

What went well:

Next step: _____

High Five! You used careful place value thinking today. That is strong mathematician behaviour!

Year 4 Maths - Place Value and Decimals - Answer Key

For teachers, parents and tutors

Detailed Answers

1. Warm Up: 4 tenths; 2.61; 7.85.
2. Build: 4.07, 4.17, 4.7/4.70. A place value chart should show 6 ones, 3 tenths and 8 hundredths.
3. Zara compared hundredths to tenths incorrectly; 5.70 is greater than 5.09.
4. Challenge: Answers vary, for example 3.21, 3.34 and 3.49 with a clear explanation.

Parent Tip - At Home

Use prices at home. Ask: Which costs more, \$4.50 or \$4.05? Let your child explain using dollars, tenths and hundredths.

Teacher Tip - In Class

Model a place value chart first. Ask students to say the decimal aloud, then compare one column at a time.

Extension Idea

Create a mini shop with three prices between \$2 and \$8. Order the prices from cheapest to most expensive.
