

Name: _____

Date: _____

LEARNING TARGET

I can add and subtract within 1,000 using hundreds, tens, and ones.

KEY STRATEGY + WORKED EXAMPLE

Combine or separate matching place values and regroup whenever a place has too many or too few units.

$356 + 278 = 634$: add ones, tens, and hundreds, regrouping twice.

A. TRY TOGETHER - USE THE STRATEGY

1. $234 + 145 =$ ____

2. $462 - 231 =$ ____

3. $378 + 246 =$ ____

4. $700 - 358 =$ ____

B. CORE PRACTICE - SHOW YOUR WORK

5. $425 + 367 =$ ____

7. $536 + 288 =$ ____

9. $247 + 539 =$ ____

11. $619 + 175 =$ ____

6. $681 - 249 =$ ____

8. $900 - 476 =$ ____

10. $754 - 328 =$ ____

12. $803 - 267 =$ ____

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. $348 + 427 =$ ____

15. $569 + 236 =$ ____

17. $184 + 698 =$ ____

19. $735 + 189 =$ ____

14. $720 - 384 =$ ____

16. $950 - 475 =$ ____

18. $641 - 257 =$ ____

20. $812 - 396 =$ ____

Name: _____

Date: _____

D. APPLY THE SKILL

21. A school collects 468 cans Monday and 275 Tuesday. How many cans total?

22. A warehouse has 820 boxes and ships 347. How many remain?

23. A runner completes 356 meters, then 289 meters. The goal is 800 meters. How many meters remain?

E. REASON, CHECK AND CORRECT

24. Mia says $405 - 178 = 373$. Use estimation or addition to identify and correct the error.

25. Explain why 10 tens can be regrouped as 1 hundred during addition.

EXIT TICKET + CHALLENGE

26. Solve $703 - 286$ and check with addition.

Challenge: Create an addition and a subtraction equation that both use 625 and 278.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 379. 2) 231. 3) 624. 4) 342.

B. 5) 792. 6) 432. 7) 824. 8) 424. 9) 786. 10) 426. 11) 794. 12) 536.

C. 13) 775. 14) 336. 15) 805. 16) 475. 17) 882. 18) 384. 19) 924. 20) 416.

D. 21) 743 cans. 22) 473 boxes. 23) 155 meters.

E. 24) 227; check $178 + 227 = 405$. 25) Both equal 100.

EXIT. 26) 417; $417 + 286 = 703$.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Line up place values. Regroup across a zero carefully and verify subtraction by adding the difference and subtrahend.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
