

Addition and Subtraction Word Problems

USA Grade 2 Math
CCSS 2.OA.A.1

Name: _____

Date: _____

LEARNING TARGET

I can solve one-step and two-step addition and subtraction word problems within 100.

KEY STRATEGY + WORKED EXAMPLE

Read each part, identify the unknown, write an equation, solve, and label the answer.

Mia has 28 books and gets 15 more. $28 + 15 = 43$ books.

A. TRY TOGETHER - USE THE STRATEGY

- 24 birds join 18 birds. How many birds now?
- 63 apples; 27 are used. How many remain?
- 35 red beads and 29 blue beads. How many total?
- Some stickers plus 18 equals 52. How many stickers?

B. CORE PRACTICE - SHOW YOUR WORK

5. $46 + 27 = \underline{\hspace{2cm}}$

7. $\underline{\hspace{1cm}} + 24 = 61$

9. $19 + 38 = \underline{\hspace{2cm}}$

11. $27 + 16 + 8 = \underline{\hspace{2cm}}$

6. $82 - 35 = \underline{\hspace{2cm}}$

8. $73 - \underline{\hspace{1cm}} = 28$

10. $90 - 46 = \underline{\hspace{2cm}}$

12. $84 - 25 + 9 = \underline{\hspace{2cm}}$

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. $37 + 25 = \underline{\hspace{2cm}}$

15. $46 + 19 = \underline{\hspace{2cm}}$

17. $28 + 34 = \underline{\hspace{2cm}}$

19. $53 + 28 = \underline{\hspace{2cm}}$

14. $71 - 38 = \underline{\hspace{2cm}}$

16. $80 - 27 = \underline{\hspace{2cm}}$

18. $95 - 49 = \underline{\hspace{2cm}}$

20. $62 - 36 = \underline{\hspace{2cm}}$

Addition and Subtraction Word Problems

USA Grade 2 Math
CCSS 2.OA.A.1

Name: _____

Date: _____

D. APPLY THE SKILL

21. A store has 36 red kites and 27 blue kites. It sells 18 kites. How many remain?

22. A class reads 24 pages Monday and 19 Tuesday. They have 17 pages left. How many pages is the book?

23. There are 75 seats. Forty-eight are filled. Then 9 more people sit down. How many empty seats remain?

E. REASON, CHECK AND CORRECT

24. Liam solved $54 - 29$ as 35. Use addition to check and correct him.

25. Write equations for a two-step story that starts at 32, adds 18, then subtracts 9.

EXIT TICKET + CHALLENGE

26. Ava has 67 cards and gives away 28. Solve and check with addition.

Challenge: Write and solve a two-step word problem with an answer between 40 and 60.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 42. 2) 36. 3) 64. 4) 34.

B. 5) 73. 6) 47. 7) 37. 8) 45. 9) 57. 10) 44. 11) 51. 12) 68.

C. 13) 62. 14) 33. 15) 65. 16) 53. 17) 62. 18) 46. 19) 81. 20) 26.

D. 21) 45 kites. 22) 60 pages. 23) 18 empty seats.

E. 24) 25, because $29 + 25 = 54$. 25) $32 + 18 = 50$; $50 - 9 = 41$.

EXIT. 26) 39 cards; $39 + 28 = 67$.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may combine every number without considering the story. Identify what changes at each step and label each intermediate result.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
