

Comparing Three-Digit Numbers

USA Grade 2 Math
CCSS 2.NBT.A.4

Name: _____

Date: _____

LEARNING TARGET

I can compare and order three-digit numbers using place value and symbols.

KEY STRATEGY + WORKED EXAMPLE

Compare hundreds first, then tens, then ones. Stop at the first place that differs.

468 > 451 because the hundreds match and 6 tens is greater than 5 tens.

A. TRY TOGETHER - USE THE STRATEGY

1. 326 ____ 362
2. 705 ____ 699
3. 480 ____ 480
4. Order least to greatest: 521, 512, 525

B. CORE PRACTICE - SHOW YOUR WORK

5. 438 ____ 483

6. 902 ____ 920

7. 677 ____ 676

8. 590 ____ 509

9. 801 ____ 799

10. 345 ____ 354

11. 700 ____ 700

12. 268 ____ 286

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. 419 ____ 491

14. 888 ____ 808

15. 630 ____ 629

16. 507 ____ 570

17. 999 ____ 1000

18. 742 ____ 724

19. 305 ____ 350

20. 860 ____ 806

Comparing Three-Digit Numbers

USA Grade 2 Math
CCSS 2.NBT.A.4

Name: _____

Date: _____

D. APPLY THE SKILL

21. One school has 487 students and another has 478. Which has more?

22. Order these race scores greatest to least: 609, 690, 619.

23. A number is greater than 725 but less than 730. List all possibilities.

E. REASON, CHECK AND CORRECT

24. Ava says $398 > 402$ because $9 > 0$. Explain her error.

25. Write the greatest three-digit number using 2, 5, and 8 once each.

EXIT TICKET + CHALLENGE

26. Compare 706 and 670 using a symbol and place-value explanation.

Challenge: Create three numbers that round around 500 and order them from least to greatest.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) $<$. 2) $>$. 3) $=$. 4) 512, 521, 525.

B. 5) $<$. 6) $<$. 7) $>$. 8) $>$. 9) $>$. 10) $<$. 11) $=$. 12) $<$.

C. 13) $<$. 14) $>$. 15) $>$. 16) $<$. 17) $<$. 18) $>$. 19) $<$. 20) $>$.

D. 21) 487-student school. 22) 690, 619, 609. 23) 726, 727, 728, 729.

E. 24) Hundreds must be compared first: 3 hundreds $<$ 4 hundreds, so $398 < 402$. 25) 852.

EXIT. 26) $706 > 670$ because 7 hundreds $>$ 6 hundreds.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may compare only one digit. Begin at the greatest place and move right only when digits are equal.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
