

Counting Coins and Money Word Problems

USA Grade 2 Math
CCSS 2.MD.C.8

Name: _____

Date: _____

LEARNING TARGET

I can find the value of groups of coins and solve money word problems.

KEY STRATEGY + WORKED EXAMPLE

Count high-value coins first: quarters, dimes, nickels, then pennies. Write the cent symbol.

2 quarters + 1 dime + 3 pennies = 50 + 10 + 3 = 63 cents.

A. TRY TOGETHER - USE THE STRATEGY

1. 3 dimes + 4 pennies = ____ cents
2. 1 quarter + 2 nickels = ____ cents
3. 2 quarters + 3 dimes = ____ cents
4. 1 dime + 1 nickel + 6 pennies = ____ cents

B. CORE PRACTICE - SHOW YOUR WORK

5. 4 dimes + 2 pennies = ____ cents

7. 2 nickels + 7 pennies = ____ cents

9. 5 dimes + 3 nickels = ____ cents

11. 6 nickels = ____ cents

6. 3 quarters = ____ cents

8. 1 quarter + 4 dimes = ____ cents

10. 2 quarters + 2 dimes + 5 pennies = ____ cents

12. 1 quarter + 1 dime + 1 nickel = ____ cents

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. 7 dimes = ____ cents

15. 3 dimes + 8 pennies = ____ cents

17. 1 quarter + 5 pennies = ____ cents

19. 5 dimes + 4 pennies = ____ cents

14. 4 quarters = \$____

16. 2 quarters + 4 nickels = ____ cents

18. 9 nickels = ____ cents

20. 3 quarters + 2 dimes = ____ cents

Counting Coins and Money Word Problems

USA Grade 2 Math
CCSS 2.MD.C.8

Name: _____

Date: _____

D. APPLY THE SKILL

21. A pencil costs 38 cents. You pay with 4 dimes. How much change?

22. A snack costs 65 cents. Show one coin combination that pays exactly.

23. You have 2 quarters, 3 dimes, and 4 pennies. Can you buy an 85-cent item? Explain.

E. REASON, CHECK AND CORRECT

24. Sam says 2 dimes and 5 pennies equal 205 cents. Explain his error.

25. Which is worth more: 3 quarters or 7 dimes? By how much?

EXIT TICKET + CHALLENGE

26. Find the value of 2 quarters, 1 dime, 2 nickels, and 6 pennies.

Challenge: Show two different coin combinations worth exactly 50 cents.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 34. 2) 35. 3) 80. 4) 21.

B. 5) 42. 6) 75. 7) 17. 8) 65. 9) 65. 10) 75. 11) 30. 12) 40.

C. 13) 70. 14) 1.00. 15) 38. 16) 70. 17) 30. 18) 45. 19) 54. 20) 95.

D. 21) 2 cents. 22) Answers vary, e.g. 2 quarters + 1 dime + 1 nickel. 23) No; total is 84 cents.

E. 24) It equals 25 cents; coin values are added. 25) 3 quarters, by 5 cents.

EXIT. 26) 76 cents.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Coin count is not coin value. Record each coin's value, add in cents, and use the dollar sign only for dollar amounts.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
