

Name: _____

Date: _____

LEARNING TARGET

I can describe three-digit numbers using hundreds, tens, and ones.

KEY STRATEGY + WORKED EXAMPLE

Read each digit by its place: hundreds, tens, then ones. Ten tens make one hundred.

472 = 4 hundreds + 7 tens + 2 ones = 400 + 70 + 2.

A. TRY TOGETHER - USE THE STRATEGY

1. 326 = ____ hundreds, ____ tens, ____ ones
2. 5 hundreds, 8 tens, 4 ones = ____
3. $700 + 20 + 6 =$ ____
4. Ten tens = ____ hundred

B. CORE PRACTICE - SHOW YOUR WORK

5. $481 =$ ____ + ____ + ____

7. 905 = ____ hundreds, ____ tens, ____ ones

9. The value of 7 in 274 is ____

11. 4 hundreds + 12 tens = ____

6. 6 hundreds, 3 tens, 9 ones = ____

8. $200 + 80 + 1 =$ ____

10. The value of 5 in 531 is ____

12. 890 has ____ tens altogether

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. $647 =$ ____ + ____ + ____

15. $900 + 40 + 2 =$ ____

17. 52 tens = ____

19. 999 has ____ hundreds

14. 3 hundreds, 0 tens, 8 ones = ____

16. Value of 6 in 764 = ____

18. 1 hundred = ____ tens

20. 430 has ____ ones

Name: _____

Date: _____

D. APPLY THE SKILL

21. A library has 6 boxes of 100 books, 4 boxes of 10 books, and 7 single books. How many books?

22. Build 805 with hundreds, tens, and ones. Explain the zero.

23. A number has 3 hundreds and 15 tens. What is the number after regrouping?

E. REASON, CHECK AND CORRECT

24. Noah says 608 has 6 hundreds and 8 tens. Correct him.

25. Explain why 10 tens and 1 hundred have equal value.

EXIT TICKET + CHALLENGE

26. Represent 739 in standard form, expanded form, and place-value form.

Challenge: Find a number with 5 hundreds whose tens digit is twice its ones digit.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 3, 2, 6. 2) 584. 3) 726. 4) 1.

B. 5) $400 + 80 + 1$. 6) 639. 7) 9, 0, 5. 8) 281. 9) 70. 10) 500. 11) 520. 12) 89.

C. 13) $600 + 40 + 7$. 14) 308. 15) 942. 16) 60. 17) 520. 18) 10. 19) 9. 20) 0.

D. 21) 647 books. 22) 8 hundreds, 0 tens, 5 ones; zero shows no tens. 23) 450.

E. 24) 6 hundreds, 0 tens, 8 ones. 25) Both equal 100.

EXIT. 26) 739; $700 + 30 + 9$; 7 hundreds, 3 tens, 9 ones.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

A zero is a place holder, not permission to shift another digit. Regroup 10 tens as 1 hundred when needed.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
