LEARNING INTENTION

I am learning to use knowledge of Latin and Greek root words to decode, spell and understand the meaning of complex vocabulary.

KEY IDEA

Many advanced English words come from Latin and Greek roots. Knowing roots like 'spect' (to look), 'dict' (to say), 'port' (to carry), 'scrib/script' (to write) and 'aud' (to hear) helps unlock the meaning of hundreds of related words across all subject areas.

WARM UP — QUICK CHECK!

The root 'spect' means 'to look'. Use it to explain the meaning of each word:

inspect =

spectacular =

spectator =

retrospect =

A — MATCH ROOT TO MEANING

Draw a line to match each root to its meaning:

port (Latin)	to carry
dict (Latin)	to say or speak
scrib/script	to write
aud (Latin)	to hear
graph (Greek)	to write or draw

B — BUILD THE WORD FAMILY

Using the root 'port' (to carry), complete each word and write its meaning:

1. trans_____able =
across

3. sup_____ =

4. predict =
Using 'dict' (to say), explain each word:

5. contradict =

C — ROOT WORD INVESTIGATION

The root 'scrib/script' means 'to write'. List 4 words using this root and explain how each connects to the idea of writing:

D — CROSS-CURRICULUM ROOTS

Many science and maths words use Greek/Latin roots. Explain the meaning of each word using the roots provided:

1. 'biology' — bio (life) + logy (study of) =

2. 'thermometer' — thermo (heat) + meter (measure) =

3. 'photosynthesis' — photo (light) + syn (together) + thesis (putting) =

Answer Guide (For Parent / Teacher Use)

Warm Up: inspect = to look closely into something. spectacular = worth looking at, impressive. spectator = a person who watches/looks. retrospect = looking back on the past.

A: port=carry, dict=say/speak, scrib/script=write, aud=hear, graph=write/draw.

B1: transport = to carry across.

B2: portable = able to be carried.

B3: support = to carry/hold up from below.

B4: predict = to say beforehand what will happen.

B5: contradict = to say the opposite/against.

C: Accept any 4 e.g. scribble (to write quickly), describe (to write/tell about), manuscript (hand-written), prescription (written instructions), subscribe (to write one's name to support).

D1: biology = the study of life.

D2: thermometer = an instrument that measures heat.

D3: photosynthesis = the process of putting together (making food) using light.

EXTENSION / CHALLENGE

Investigate the roots 'graph' (write/draw), 'phon' (sound), 'chron' (time) and 'geo' (earth). Find 3 English words for each root and explain how the root's meaning connects to each word.

PARENT TIP

When you encounter an unfamiliar long word together, break it apart: 'What root do you recognise? What might that part mean?' This builds vocabulary independence that transfers across all subjects.

TEACHER TIP

Create a Latin/Greek root word investigation centre. Students research one root per week and build a class root word dictionary using examples from different subject areas.

STUDENT REFLECTION

[] I can identify common Latin and Greek roots and their meanings

[] I can use root word knowledge to work out meanings of unfamiliar words

[] I can find multiple related words that share the same root
