

Mixing Materials

Year 2 Science | Aussie Primary Academy

Name: _____

Date: _____

ACARA v9.0: AC9S2U04 - Different materials can be combined, including by mixing, for a particular purpose.

Learning Intention

I can identify materials that can be mixed or combined for a purpose.

Mini Lesson

Materials can be combined. Mixing means putting materials together. People mix or combine materials to make things useful, such as dough, paint colours, concrete or a fruit salad.

Vocabulary

mix

combine

purpose

material

A. Circle or Tick

Circle things made by mixing or combining:
dough plain rock fruit salad paint colour
metal spoon smoothie

B. Match

Match the mix to a purpose:
flour + water -> dough
red + yellow paint -> orange
fruit pieces -> fruit salad

Mixing Materials

Year 2 Science | Do, Think and Explain

Name: _____

Date: _____

ACARA v9.0: AC9S2U04 - Different materials can be combined, including by mixing, for a particular purpose.

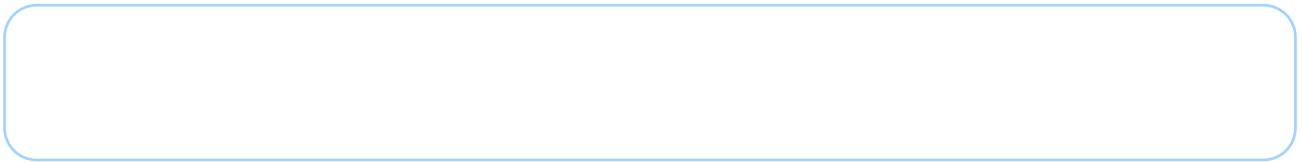

C. Sort and Think

Sort into Mix or Not a Mix.

water and cordial, wooden chair, smoothie, glass window, sand and water, paper sheet

D. Draw and Label

Draw two materials being mixed or combined. Label the purpose.

E. Science Detective

Why might a builder mix sand, cement and water?

I Can Checklist

- ☐ I can name materials.
- ☐ I can identify a mix.
- ☐ I can explain a purpose.

Mixing Materials - Answer Key

Year 2 Science | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9S2U04 - Different materials can be combined, including by mixing, for a particular purpose.

Answer Key

A: dough, fruit salad, paint colour, smoothie.

B: flour + water - dough; red + yellow paint - orange; fruit pieces - fruit salad.

C: Mix: water and cordial, smoothie, sand and water. Not a Mix: wooden chair, glass window, paper sheet. Some objects are made from combined materials; accept explained answers.

D/E: Builders mix materials to make something strong/useful for building.

Parent/Teacher Tip

In the kitchen, safely point out examples of mixing, such as cereal and milk or fruit salad.

Extension Idea

Predict: What might happen if you mix sand and water? Observe safely.
