

ACARA V9.0 · AC9M1N05 — Solve practical addition & subtraction problems using diagrams and materials

Learning Intention

I can use pictures to help me solve addition and subtraction stories.

Warm-Up

Look at the picture. Count the objects out loud with a grown-up before you start!

+ = _____ apples

1. Ducks on the Pond

are swimming. more join them.

How many ducks now?

.....

— —

2. Balloons at the Party

balloons. pop!

How many balloons are left?

.....

~~~~~ ~~~

#### 3. Toy Cars

red cars and blue cars.

How many cars altogether?

.....

•

#### 4. Butterflies in the Garden

butterflies. fly away.

How many butterflies are left?

.....

### High Five Self-Check

Colour a star for each problem you solved on your own.

### Extension Activity

Draw your own picture story with 8 animals. Ask a friend to solve it!

### Parent / Teacher Tip

Let your child touch and move real objects (buttons, pasta, toys) before drawing or writing numbers — hands-on counting builds the number sense pictures alone can't.

## Answers & Marking Guide

### Warm-Up

5 apples ( $3 + 2 = 5$ )

### Main Problems

1. **Ducks:** 6 ducks ( $4 + 2 = 6$ )

2. **Balloons:** 4 balloons left ( $6 - 2 = 4$ )

3. **Toy Cars:** 7 cars altogether ( $3 + 4 = 7$ )

4. **Butterflies:** 4 butterflies left ( $7 - 3 = 4$ )

### Marking Tip

If a child answers using a different but valid strategy (counting on fingers, tally marks, number line), mark it correct — focus on the reasoning, not just the final number.

### Curriculum Reference

ACARA V9.0 — AC9M1N05: Students use mathematical modelling to solve practical problems involving additive situations, including simple money transactions, representing them with diagrams and materials.
