

Year 3 Science: Life Cycles

Compare stages in plant and animal life cycles.

Name: _____

Date: _____

Learning Intention

I can describe the stages in a life cycle.

Success Criteria

I can order stages, compare two life cycles, and use science words clearly.

A. Order the Life Cycle

Number the frog life cycle from 1 to 4.

- ☐ adult frog
- ☐ eggs
- ☐ tadpole
- ☐ froglet

B. Plant Life Cycle

Fill the missing words.

seed -> seedling -> adult plant -> flower/fruit
-> _____

A plant needs _____, water and space to grow.

C. Compare

Complete the sentences.

1. A frog begins life as an _____.
2. A plant begins life as a _____.
3. One similarity between a plant and frog life cycle is: _____
4. One difference is: _____

D. Vocabulary Match

Match each word to its meaning.

Life cycle - stages a living thing goes through

Adult - fully grown

Seedling - young plant

E. Challenge

Why do life cycles repeat? Write one sentence.

Answer Key: Life Cycles

Teacher/Parent Guide - Year 3 Science

Name: _____

Date: _____

Complete Answer Key

A. eggs 1, tadpole 2, froglet 3, adult frog 4.

B. seed; sunlight.

C. 1 eggs, 2 seed, 3 both show growth and change / both repeat, 4 frogs hatch from eggs and change body shape; plants grow from seeds and make new seeds.

D. Accept matches shown on worksheet.

E. Life cycles repeat because living things reproduce and create new living things of the same kind.

Parent/Teacher Tip: Use a simple diagram. Children understand cycles faster when they can see the stages in a circle.
