

ACARA V9.0 · AC9M3N06 — Use mathematical modelling to solve practical problems including financial contexts

Learning Intention

I can solve problems involving adding and subtracting money amounts.

Warm-Up

Add the dollars and cents.

$$\$2.50 + \$1.20 = \$______$$

1. Tuckshop

You buy a \$2.80 pie and a \$1.50 juice, paying with \$5.

How much change do you get?

.....

2. Saving Goal

You save \$3 a week for 5 weeks.

How much have you saved in total?

.....

3. Market Day

3 items cost \$1.50 each.

What is the total cost?

.....

4. Class Bank

The class has \$12.40 and spends \$4.90 on craft supplies.

How much money is left?

.....

High Five Self-Check

Colour a star for each problem you solved on your own.

Extension Activity

Plan a \$10 tuckshop order using at least 3 items and calculate the change.

Parent / Teacher Tip

Play 'shop' with real coins and notes at home — Year 3 is the perfect age to practise giving correct change without a calculator.

Answers & Marking Guide

Warm-Up

\$3.70

Main Problems

1. **Tuckshop:** \$0.70 change ($\$5 - \$4.30 = \0.70)

2. **Saving Goal:** \$15 ($\$3 \times 5 = \15)

3. **Market Day:** \$4.50 ($3 \times \$1.50 = \4.50)

4. **Class Bank:** \$7.50 left ($\$12.40 - \$4.90 = \7.50)

Marking Tip

Check decimal alignment when adding/subtracting money — this is the most common slip at Year 3.
