ACARA V9.0 — AC9E3LY05: Use comprehension strategies to build literal and inferred meaning when reading fiction texts.

Learning Intention: I am learning to read a story closely and answer questions about what happened and how characters felt.**Key Idea:** **Literal** questions ask about things stated directly in the text. **Inferred** questions ask you to use clues in the text to work out something the author didn't say directly.**Warm-Up:** Before reading, guess: what do you think this story might be about, based on the title?

A. Read the Story

The Lost Kitten

Mia was walking home from school when she heard a soft meowing sound coming from behind a fence. She stopped and looked closely. There, hiding under a bush, was a small grey kitten. It looked cold and scared.

"Don't worry," Mia said gently. "I'll help you." She carefully picked up the kitten and wrapped it in her jacket. The kitten stopped shaking and began to purr softly.

Mia carried the kitten home and gave it warm milk. Her mum helped her make posters to find the kitten's owner. Two days later, a little boy from down the street knocked on their door, smiling from ear to ear. It was his kitten, Whiskers, who had wandered off during a storm.
