

Predicting and Connecting While Reading

Name: _____

Date: _____

Foundation English — Reading

ACARA v9.0: AC9EFLY05

Learning Intention

I am learning to use comprehension strategies like predicting and connecting to understand a text.

Success Criteria

- I can predict what might happen next in a story.
- I can connect a story to something in my own life.
- I can share my thinking about a text.

Guess, Then Connect

Before you know the ending, guess (predict) what might happen next. Then think: "Does this remind me of something in my own life?" (connect).

Worked Example

Story: A boy sees dark clouds in the sky.

Predict: It might rain soon.

Connect: I remember taking my umbrella to school on a rainy day.

Part A — Warm Up

A girl drops her ice cream. Predict how she might feel. _____

True or False: Predicting means guessing what might happen next. _____

Have you ever dropped something you liked? Circle: **Yes** **No**

Part B — Core Skills

Story: Dark clouds fill the sky and the wind picks up. Predict what will happen next.

Story: A boy shares his lunch with a friend who forgot theirs. Connect: Have you ever shared something? What happened?

Story: A dog digs a hole in the garden. Predict what the dog might find.

Why does predicting help us understand a story better?

Thinking Word Bank

predict • connect • guess • maybe • I think • this reminds me of

Working Space — Draw What You Predict Happens Next in Your Favourite Story

Part C — Challenge: The Lost Kitten

A little girl named Ruby hears a soft meow coming from under the house. She gets down on her knees and looks closely into the dark space.

Q8. Predict what Ruby might find under the house.

Q9. Connect: Has anything ever made a sound that made you curious? What did you do?

Q10. Ruby's brother predicts she will find a lost sock, not an animal. Explain why his prediction might be less likely than yours, using clues from the story.

Answer Key — Part A

A1: Sad, upset, or disappointed (accept any reasonable emotion).

A2: True — predicting means making a sensible guess about what might happen next.

A3: Yes or No — either is acceptable, this is a personal reflection question.

Answer Key — Part B

B1: Any reasonable prediction (e.g. it might start to rain, or a storm might come) — teacher to check.

B2: Any reasonable personal connection about sharing something — teacher to check.

B3: Any reasonable prediction (e.g. a bone, a toy, dirt) — teacher to check.

B4: Predicting helps us think ahead and pay closer attention to the story to see if our guess was right, which helps us understand and remember the story better.

Answer Key — Part C

C8: Any reasonable prediction (e.g. a kitten, since the sound was a meow) — teacher to check, but should reference the meow sound.

C9: Any reasonable personal connection — teacher to check.

C10: The story mentions a 'meow' sound, which is a sound cats/kittens make, not something a sock would make, so a prediction of an animal (like a kitten) fits the clues in the story better than a sock.

I Can Checklist

☐ I can predict what happens next.

☐ I can share my thinking about a text.

☐ I can connect a story to my own life.
