

# Year 1 Science - Daily Weather Changes

Australian Curriculum v9 | AC9S1U02

## LEARN IT - SCIENCE IDEA

Weather can change across a day. We can observe cloud cover, rain, wind, temperature and sunlight, then record a pattern.

**Remember: An observation is what we notice or measure, not what we hope will happen.**

## A. GUIDED SCIENCE THINKING

1. Name two things that describe weather.

---

2. What tool can measure temperature?

---

3. Is cloudy an observation or a prediction?

---

## B. INDEPENDENT PRACTICE

1. Record a word for today's sky.

---

2. Describe the wind.

---

3. Choose warmer: 12 degrees C or 22 degrees C.

---

4. Write one safe weather observation.

---

5. Predict the afternoon weather from a morning clue.

---

## C. I CAN SHOW MY UNDERSTANDING

Create a morning and afternoon weather record using words and symbols.

---

---

## Year 1 Science - Daily Weather Changes

Australian Curriculum v9 | AC9S1U02

### D. INVESTIGATE OR APPLY

Observe weather safely from the same place twice today. Record cloud, wind, temperature feeling and rain. Do not look directly at the Sun.

**My prediction:**

---

---

**What I observed / decided:**

---

---

---

### E. THINK LIKE A SCIENTIST

1. What changed between the two observations?

---

---

2. Which evidence supports your answer?

---

---

### MY LEARNING REVIEW

☐ I can explain it.

☐ I need a little help.

☐ I need more practice.

**I understood:**

---

---

**I found this difficult:**

---

### PARENT / CARER TIP

Make a quick weather check at breakfast and after school. Help the child compare, not just label, the conditions.

## COMPLETE ANSWER GUIDE

|                      |                                                                              |
|----------------------|------------------------------------------------------------------------------|
| <b>Guided</b>        | Any two: cloud, rain, wind, temperature, sunlight; thermometer; observation. |
| <b>Practice</b>      | Local answers; 22 degrees C is warmer; prediction should use a stated clue.  |
| <b>Independent</b>   | Two complete records with an accurate comparison.                            |
| <b>Investigation</b> | Local results; evidence must come from recorded observations.                |

## TEACHER NOTES - EVIDENCE TO NOTICE

Success evidence: Records daily weather observations and identifies a change using evidence.

Common difficulty: Confusing weather with a season or copying a forecast instead of observing.

Next step: Record at the same times for five days and look for a pattern.

## QUICK CONFERENCE RECORD

☐ Secure ☐ Developing ☐ Re-teach

**Evidence / next lesson focus:**
