

Year 1 Science - Data, Patterns and Findings

Australian Curriculum v9 | AC9S1I04 / AC9S1I05 / AC9S1I06

LEARN IT - SCIENCE IDEA

Scientists sort and order results, look for patterns, compare observations with predictions and communicate findings using clear science words.

Remember: A finding tells what the evidence shows, not only what we did.

A. GUIDED SCIENCE THINKING

1. Order these distances: 2, 5 and 3 blocks.

2. What pattern appears in sunny, sunny, rainy, sunny, sunny, rainy?

3. Finish: My prediction was supported because...

B. INDEPENDENT PRACTICE

1. Sort four objects into rolls / does not roll.

2. Find the most common result: cloud 3, sun 5.

3. Compare a result with a prediction.

4. Write one new question.

5. Choose a clear way to share results.

C. I CAN SHOW MY UNDERSTANDING

Use a small table to show three results and write one evidence-based finding.

Year 1 Science - Data, Patterns and Findings

Australian Curriculum v9 | AC9S1I04 / AC9S1I05 / AC9S1I06

D. INVESTIGATE OR APPLY

Results: gentle push - 2 blocks; medium push - 5 blocks; strong push - 8 blocks. Represent the results, identify the pattern and communicate a conclusion.

My prediction:

What I observed / decided:

E. THINK LIKE A SCIENTIST

1. Do the results support the prediction that stronger pushes move the toy farther?

2. What would make the comparison fair?

MY LEARNING REVIEW

☐ I can explain it.

☐ I need a little help.

☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Ask the child to point to the exact result that supports their conclusion. This builds evidence-based explanation.

Year 1 Science - Data, Patterns and Findings

Australian Curriculum v9 | AC9S1I04 / AC9S1I05 / AC9S1I06

COMPLETE ANSWER GUIDE

Guided	2, 3, 5; sunny-sunny-rainy repeats; ending must refer to evidence.
Practice	Sorting depends on objects; sun; comparisons/questions vary; table, drawing or oral explanation may be suitable.
Independent	Three accurate table entries and a finding directly linked to the data.
Investigation	Yes; distances increase with push strength. Keep toy, surface and start point the same.

TEACHER NOTES - EVIDENCE TO NOTICE

Success evidence: Represents data, identifies a simple pattern and communicates a conclusion supported by evidence.

Common difficulty: Retelling the procedure instead of stating what the results mean.

Next step: Compare results with another student and ask a further question.

QUICK CONFERENCE RECORD

☐ Secure

☐ Developing

☐ Re-teach
