

LEARN IT - SCIENCE IDEA

Weather and seasonal changes affect clothing, travel, play, plants, animals and safety choices. People use observations and forecasts to plan.

Remember: Link the condition to a sensible action and explain why.

A. GUIDED SCIENCE THINKING

1. Choose a useful item for rain.

2. Why might people seek shade on a hot day?

3. How can strong wind change an outdoor plan?

B. INDEPENDENT PRACTICE

1. Match cold weather with suitable clothing.

2. Name a safe choice during a thunderstorm.

3. Explain why plants may need more water in hot weather.

4. Write one activity suited to a mild day.

5. Complete: The forecast says rain, so...

C. I CAN SHOW MY UNDERSTANDING

Choose one weather condition and write three ways it could affect everyday life.

D. INVESTIGATE OR APPLY

Plan a safe class picnic for one forecast: hot and sunny, cool and rainy, or windy. Include clothing, equipment and activity changes.

My prediction:

What I observed / decided:

E. THINK LIKE A SCIENTIST

1. Which choice was most important for safety?

2. What would you change if the forecast changed?

MY LEARNING REVIEW

☐ I can explain it.

☐ I need a little help.

☐ I need more practice.

I understood:

I found this difficult:

PARENT / CARER TIP

Check tomorrow's forecast together and ask the child to justify one clothing or activity choice.

COMPLETE ANSWER GUIDE

Guided	Raincoat/umbrella; to reduce heat and sun exposure; move or change the activity for safety.
Practice	Warm layers; stay indoors away from windows and follow adults; water loss can increase; other answers vary.
Independent	Three logical condition-and-effect links.
Investigation	Plan matches the chosen forecast and includes safe, practical adjustments.

TEACHER NOTES - EVIDENCE TO NOTICE

Success evidence: Explains how environmental changes influence sensible daily choices.

Common difficulty: Listing weather items without explaining the connection.

Next step: Compare plans for two contrasting forecasts.

QUICK CONFERENCE RECORD
