

Addition and Subtraction Word Problems

USA Grade 1 Math
CCSS 1.OA.A.1

Name: _____

Date: _____

LEARNING TARGET

I can solve addition and subtraction word problems within 20.

KEY STRATEGY + WORKED EXAMPLE

Read, act or draw, write an equation, solve, and label the answer.

There are 7 cats. 5 more arrive. $7 + 5 = 12$ cats.

A. TRY TOGETHER - USE THE STRATEGY

1. 6 red balloons and 7 blue balloons. How many altogether?
2. 15 cookies; 6 are eaten. How many remain?
3. 8 frogs plus some more makes 14. How many more?
4. 17 birds; 9 fly away. How many stay?

B. CORE PRACTICE - SHOW YOUR WORK

5. $9 + 5 = \underline{\quad}$

6. $16 - 7 = \underline{\quad}$

7. $\underline{\quad} + 6 = 13$

8. $18 - \underline{\quad} = 10$

9. $7 + 8 = \underline{\quad}$

10. $14 - 5 = \underline{\quad}$

11. $4 + \underline{\quad} = 12$

12. $\underline{\quad} - 6 = 9$

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. $5 + 9 = \underline{\quad}$

14. $17 - 8 = \underline{\quad}$

15. $6 + 7 = \underline{\quad}$

16. $13 - 4 = \underline{\quad}$

17. $8 + 8 = \underline{\quad}$

18. $19 - 9 = \underline{\quad}$

19. $3 + 8 = \underline{\quad}$

20. $12 - 5 = \underline{\quad}$

Addition and Subtraction Word Problems

USA Grade 1 Math
CCSS 1.OA.A.1

Name: _____

Date: _____

D. APPLY THE SKILL

21. Nora has 7 toy cars. Ben has 5 more than Nora. How many cars does Ben have?

22. There are 18 children. Ten are wearing hats. How many are not wearing hats?

23. A jar has 6 red beads and 9 green beads. How many beads are in the jar?

E. REASON, CHECK AND CORRECT

24. Which operation solves: 13 birds, 5 leave? Explain.

25. Write an equation for: 8 fish plus some fish equals 17 fish.

EXIT TICKET + CHALLENGE

26. Kai has 16 blocks and gives away 7. Solve and label the answer.

Challenge: Write your own compare problem. Include an unknown and solve it.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 13. 2) 9. 3) 6. 4) 8.

B. 5) 14. 6) 9. 7) 7. 8) 8. 9) 15. 10) 9. 11) 8. 12) 15.

C. 13) 14. 14) 9. 15) 13. 16) 9. 17) 16. 18) 10. 19) 11. 20) 7.

D. 21) 12 cars. 22) 8 children. 23) 15 beads.

E. 24) Subtraction, because some leave: $13 - 5 = 8$. 25) $8 + 9 = 17$.

EXIT. 26) 9 blocks.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Do not choose an operation from a keyword alone. Ask what is happening to the quantity and identify the unknown.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
