

Comparing Two-Digit Numbers

USA Grade 1 Math
CCSS 1.NBT.B.3

Name: _____

Date: _____

LEARNING TARGET

I can compare two-digit numbers using $>$, $<$, and $=$.

KEY STRATEGY + WORKED EXAMPLE

Compare the tens first. If the tens are equal, compare the ones.

47 > 42 because both have 4 tens, but 7 ones is more than 2 ones.

A. TRY TOGETHER - USE THE STRATEGY

1. 34 ____ 43

2. 58 ____ 55

3. 70 ____ 70

4. 29 ____ 31

B. CORE PRACTICE - SHOW YOUR WORK

5. 46 ____ 64

7. 55 ____ 50

9. 91 ____ 89

11. 63 ____ 68

6. 82 ____ 79

8. 38 ____ 38

10. 27 ____ 72

12. 44 ____ 41

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. 19 ____ 20

15. 85 ____ 85

17. 48 ____ 84

19. 57 ____ 52

14. 76 ____ 67

16. 39 ____ 36

18. 92 ____ 99

20. 60 ____ 59

Comparing Two-Digit Numbers

USA Grade 1 Math
CCSS 1.NBT.B.3

Name: _____

Date: _____

D. APPLY THE SKILL

21. One jar has 47 buttons and another has 52. Which jar has more?

22. Liam reads 68 pages and Zoe reads 63 pages. Who reads fewer?

23. Put in order from least to greatest: 45, 54, 49.

E. REASON, CHECK AND CORRECT

24. Ana says $39 > 42$ because $9 > 2$. Explain her mistake.

25. Write a number greater than 67 but less than 72.

EXIT TICKET + CHALLENGE

26. Compare 78 and 87 using a symbol and place-value explanation.

Challenge: Use digits 3, 5, and 8 to make the greatest and least two-digit numbers without repeating a digit.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) $<$. 2) $>$. 3) $=$. 4) $<$.

B. 5) $<$. 6) $>$. 7) $>$. 8) $=$. 9) $>$. 10) $<$. 11) $<$. 12) $>$.

C. 13) $<$. 14) $>$. 15) $=$. 16) $>$. 17) $<$. 18) $<$. 19) $>$. 20) $>$.

D. 21) The jar with 52. 22) Zoe. 23) 45, 49, 54.

E. 24) Compare tens first: 3 tens is less than 4 tens, so $39 < 42$. 25) 68, 69, 70, or 71.

EXIT. 26) $78 < 87$ because 7 tens is less than 8 tens.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Comparing only the ones digit gives incorrect results. Always begin with the greatest place value: the tens.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
