

Measuring and Comparing Lengths

USA Grade 1 Math
CCSS 1.MD.A.1

Name: _____

Date: _____

LEARNING TARGET

I can order and compare three objects by length.

KEY STRATEGY + WORKED EXAMPLE

Line up one end of each object. Then compare how far each object reaches.

A 9-inch ribbon is longer than a 6-inch ribbon because $9 > 6$.

A. TRY TOGETHER - USE THE STRATEGY

1. Order least to greatest: 5 in, 9 in, 7 in.
2. Which is longer: 8 in or 11 in?
3. Complete: 6 in is ____ than 10 in.
4. Order greatest to least: 12 in, 4 in, 8 in.

B. CORE PRACTICE - SHOW YOUR WORK

5. 3 in ____ 7 in

7. 9 in ____ 9 in

9. Greatest to least: 6, 11, 9 in

11. Shorter: 4 in or 7 in?

6. 10 in ____ 6 in

8. Least to greatest: 8, 2, 5 in

10. Longer: 13 in or 12 in?

12. $5 \text{ in} + 3 \text{ in} =$ ____ in

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. 2 in ____ 6 in

15. 7 in ____ 7 in

17. 3, 8, 5 least first: ____

19. Difference: 11 in and 6 in = ____ in

14. 12 in ____ 10 in

16. $9 \text{ in} - 4 \text{ in} =$ ____ in

18. 14 in is ____ than 9 in

20. Between 4 in and 9 in: ____ in

Name: _____

Date: _____

D. APPLY THE SKILL

21. A pencil is 7 inches and a marker is 5 inches. Which is longer and by how much?

22. Three ribbons are 4, 9, and 6 inches. Order them shortest to longest.

23. A book is 10 inches long. A notebook is 3 inches shorter. How long is the notebook?

E. REASON, CHECK AND CORRECT

24. Two objects start at different points on a ruler. Explain why the comparison may be unfair.

25. A straw is longer than a 6-inch crayon but shorter than a 10-inch pencil. Give one possible length.

EXIT TICKET + CHALLENGE

26. Order 8, 3, and 11 inches from longest to shortest.

Challenge: Find three classroom objects. Predict their order by length, then measure or compare to check.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 5, 7, 9 in. 2) 11 in. 3) shorter. 4) 12, 8, 4 in.

B. 5) $<$. 6) $>$. 7) $=$. 8) 2, 5, 8. 9) 11, 9, 6. 10) 13 in. 11) 4 in. 12) 8 in.

C. 13) $<$. 14) $>$. 15) $=$. 16) 5. 17) 3, 5, 8. 18) longer. 19) 5. 20) Answers vary: 5, 6, 7, or 8.

D. 21) Pencil, by 2 inches. 22) 4, 6, 9 inches. 23) 7 inches.

E. 24) Their ends must be aligned for a fair comparison. 25) 7, 8, or 9 inches.

EXIT. 26) 11, 8, 3 inches.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Always align endpoints. A farther endpoint does not prove an object is longer if the objects started at different positions.

TEACHER CHECK

- ☐ Uses an appropriate Grade 1 strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks an answer using a second representation or related fact.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
