

ACARA V9.0 · AC9M5N09 — Compare, order and represent fractions and decimals in real contexts

Learning Intention

I can use fractions and decimals to solve everyday problems.

Warm-Up

Convert the fraction.

$\frac{1}{2}$ of 20 lollies = _____ lollies

1. Pizza Party

A pizza is cut into 8 slices. $\frac{3}{4}$ of it is eaten.

How many slices were eaten?

.....

2. Petrol Tank

A car's tank holds 60L. It is 0.75 full.

How many litres are in the tank?

.....

3. Recipe Scaling

A recipe needs 2.5 cups of flour for 1 batch.

How much flour is needed for 3 batches?

.....

4. Race Distance

A runner completes $\frac{3}{5}$ of a 10km race.

How many km has the runner completed?

.....

High Five Self-Check

Colour a star for each problem you solved on your own.

Extension Activity

Find 3 examples of fractions or decimals used in your kitchen or pantry (labels, recipes, measuring cups).

Parent / Teacher Tip

Cooking together is one of the best real-world fraction lessons — measuring cups make abstract fractions instantly concrete.

Answers & Marking Guide

Warm-Up

10 lollies ($\frac{1}{2} \times 20 = 10$)

Main Problems

1. **Pizza Party:** 6 slices ($\frac{3}{4} \times 8 = 6$)

2. **Petrol Tank:** 45 litres ($0.75 \times 60 = 45$)

3. **Recipe Scaling:** 7.5 cups ($2.5 \times 3 = 7.5$)

4. **Race Distance:** 6km ($\frac{3}{5} \times 10 = 6$)

Marking Tip

Accept equivalent fraction/decimal forms (e.g. 0.5 or $\frac{1}{2}$) as correct — flexibility between representations is the key Year 5 skill.
