Straight, Reflex and Revolution Angles

Year 4 · Mathematics · Measurement | A4 · Learn + Notice

Name: _____ Date: _____

LEARNING INTENTION

I can recognise larger turns and compare them with right angles.

KEY IDEA

Straight: 180° (half turn). Reflex: greater than 180° and less than 360°. Revolution: 360° (full turn).

VOCABULARY

straight · reflex · revolution · half turn · full turn

LEARN IT: A Worked Model

The curved mark tells you which opening to use. Between the same arms, a small opening and a larger reflex opening can both exist.

180°

Use the marked opening. Diagrams for calculation tasks are not drawn to scale.

SUCCESS CRITERIA

- ☐ I can recognise larger turns and compare them with right angles.
- ☐ I can explain the benchmark, tool or angle rule I used.
- ☐ I can check my answer and correct a mistake.

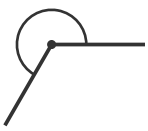
NOTICE IT: Guided Practice

Name each marked angle.

A.

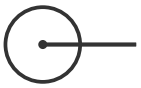
Answer: _____

B.



Answer: _____

C.



Answer: _____

Straight, Reflex and Revolution Angles

Year 4 · Mathematics · Measurement | A4 · Practise + Apply + Reason

PRACTISE IT: Independent Questions

Name each marked angle.

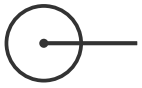
A.

Answer: _____

B.

Answer: _____

C.



Answer: _____

D.

Answer: _____

E.

Answer: _____

F.

Answer: _____

APPLY IT

Draw a straight angle and a reflex angle. Mark the intended opening clearly.

EXPLAIN HOW YOU KNOW: Misconception Check

Sam labels a marked 270° turn as right because the arms look perpendicular. Explain why the curved mark matters.

CHALLENGE: Reasoning Task

How many quarter turns make a straight angle? How many make a revolution?

MY SELF-REVIEW

Circle one: I understand it / I need more practice / I need help

Straight, Reflex and Revolution Angles

Year 4 · Mathematics · Measurement | A4 · Teacher Copy

ANSWER KEY: Guided + Independent Practice

Notice: A straight; B reflex; C revolution.

Practice: A straight; B reflex; C revolution; D obtuse; E reflex; F right.

Apply: straight arms in opposite directions; reflex marking exceeds a half turn.

Reason: the marked turn is 270°, not the small 90° opening.

Challenge: 2 quarter turns; 4 quarter turns.

COMMON MISCONCEPTION

The same two arms can bound different openings. Always follow the curved marking.

TEACHER PROMPT

Ask: "Which opening are you using? What benchmark or angle relationship applies? How can you check your answer?"

NEXT-STEP GUIDANCE

Move to comparing and estimating all angle types.

PRINTING AND ASSESSMENT

Print A4 at actual size. Use a square corner to compare openings. Students do not need a protractor for recognition tasks.
