Missing Angles in a Right Angle

Year 6 · Mathematics · Measurement | C1 · Learn + Notice

Name: _____ Date: _____

LEARNING INTENTION

I can use a 90° total to calculate an unknown angle.

KEY IDEA

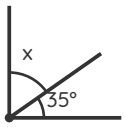
Two adjacent angles filling a right angle add to 90°. Subtract the known angle from 90° to find the missing angle.

VOCABULARY

adjacent · complementary · unknown · right angle

LEARN IT: A Worked Model

A right angle is split into 35° and x. Write 35° + x = 90°. Therefore x = 90° - 35° = 55°.



Use the marked opening. Diagrams for calculation tasks are not drawn to scale.

SUCCESS CRITERIA

- [ ] I can use a 90° total to calculate an unknown angle.
- [ ] I can explain the benchmark, tool or angle rule I used.
- [ ] I can check my answer and correct a mistake.

NOTICE IT: Guided Practice

Find x. Write the rule or total you used.

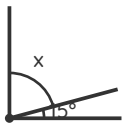
PRACTISE IT: Independent Questions

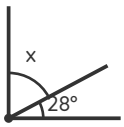
Find x. Write the rule or total you used.

A.



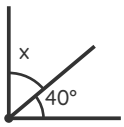
Answer: _____

B.



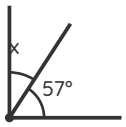
Answer: _____

C.



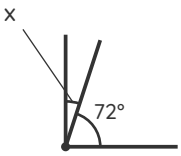
Answer: _____

D.



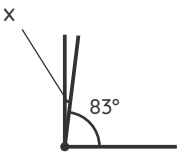
Answer: _____

E.



Answer: _____

F.



Answer: _____

APPLY IT

A quarter-turn gate opens 62°. How much more must it turn to reach a right angle? Write a number sentence.

EXPLAIN HOW YOU KNOW: Misconception Check

Ben uses 180° - 28° for a right-angle diagram. Explain why his chosen total is wrong.

CHALLENGE: Reasoning Task

A right angle is split into three parts: 18°, 27° and x. Find x and check your answer.

Missing Angles in a Right Angle

Year 6 · Mathematics · Measurement | C1 · Teacher Copy

ANSWER KEY: Guided + Independent Practice

Notice: A 70°; B 45°; C 25°.

Practice: A 75°; B 62°; C 50°; D 33°; E 18°; F 7°.

Apply: 28°, since 62° + 28° = 90°.

Reason: the complete marked opening is 90°, not 180°.

Challenge: 45°; 18° + 27° + 45° = 90°.

COMMON MISCONCEPTION

Select the total from the whole marked angle, not from a memorised subtraction rule.

TEACHER PROMPT

Ask: "Which opening are you using? What benchmark or angle relationship applies? How can you check your answer?"

NEXT-STEP GUIDANCE

Move to unknown angles on a straight line.

PRINTING AND ASSESSMENT

Print A4. Diagrams are not to scale for calculation purposes. Use stated values and angle relationships; check the explanation as well as the result.
