

Name: _____

Date: _____

LEARNING TARGET

I can create budgets, calculate change and compare value using Australian money.

KEY STRATEGY + WORKED EXAMPLE

Record income and expenses in dollars and cents, estimate first, calculate accurately, and compare equal quantities for best buys.

Example: Budget \$50. Costs \$18.75 + \$12.40 = \$31.15. Money left = \$18.85. For best buys, compare the price per item or equal amounts.**A. TRY TOGETHER - USE THE STRATEGY**

1. \$20.00 - \$7.65 = ____
2. \$50.00 - \$28.90 = ____
3. Budget \$35; expenses \$12.50 and \$8.75. Money left?
4. Better value: 4 pens for \$6 or 6 pens for \$8.40?

B. CORE PRACTICE - SHOW YOUR THINKING

5. Change from \$10 for \$6.35

6. Change from \$20 for \$13.80

7. 3 tickets at \$7.50 each

8. 5 notebooks at \$3.85 each

9. Budget \$60; spend \$18.40, \$12.75 and \$9.95

10. 2 kg rice for \$7.20 or 3 kg for \$10.20: cheaper per kg?

11. 8 juice boxes for \$6.40 or 12 for \$9.00: cheaper each?

12. Save \$12.50 weekly for 8 weeks: total?

C. INDEPENDENT PRACTICE - COMPLETE AND CHECK

13. \$100-\$46.75

14. 4 x \$8.95

15. \$75-\$28.60-\$19.85

16. Unit price: 5 items for \$12.50

17. Unit price: 8 items for \$18.40

18. Budget \$120, expenses total \$94.65: balance

19. 15% off \$40: discount

20. Half-price item marked \$27.80: sale price

Name: _____

Date: _____

D. APPLY THE SKILL

21. Plan a \$75 class snack budget using four listed costs: fruit \$18.60, crackers \$12.40, cheese \$16.75, drinks \$14.80, cups \$6.50. Find total and balance.

22. Shop A sells 3 packs of 8 markers for \$18. Shop B sells 4 packs of 6 for \$16. Compare equal total markers and identify the best buy.

23. A family budget is \$140. Groceries cost \$86.75 and transport \$28.40. A \$12.50 refund is received. Find the final balance.

E. REASON, CHECK AND CORRECT

24. Explain why the lowest packet price is not always the best buy.

25. Check this claim: Change from \$50 after spending \$18.75 and \$14.60 is \$16.65. Is it correct? Show working.

EXIT TICKET + CHALLENGE

26. Create a \$100 budget with three expenses and calculate the exact balance.

Challenge: Design two deals where the larger packet is not the best value. Prove it with unit prices.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

- A. 1) \$12.35. 2) \$21.10. 3) \$13.75. 4) 6 pens for \$8.40 (\$1.40 each vs \$1.50).
B. 5) \$3.65. 6) \$6.20. 7) \$22.50. 8) \$19.25. 9) \$18.90. 10) 3 kg for \$10.20 (\$3.40/kg vs \$3.60/kg). 11) 12 for \$9 (\$0.75 vs \$0.80). 12) \$100.
C. 13) \$53.25. 14) \$35.80. 15) \$26.55. 16) \$2.50. 17) \$2.30. 18) \$25.35. 19) \$6.00. 20) \$13.90.
D. 21) Total \$69.05; balance \$5.95. 22) Both give 24 markers; Shop B saves \$2. 23) \$37.35.
E. 24) Packet sizes differ; compare equal quantities or unit prices. 25) Correct: total \$33.35 and change \$16.65.
EXIT. 26) Answers vary; expenses must total no more than \$100 and balance must be exact.
Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.
F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may compare packet prices without comparing quantities. Use unit price or scale both deals to an equal amount.

TEACHER CHECK

- ☐ Uses an appropriate Year 5 Maths strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
