

Division Sharing Equally

Year 2 Mathematics | ACARA Final APA Version

Name: _____

Date: _____

ACARA v9.0: AC9M2N05 - multiply and divide by one-digit numbers using repeated addition, equal grouping, arrays and partitioning. Supporting: AC9M2N04 - represent problems using number sentences.

Learning Intention

I can share objects equally and write a division number sentence.

Strategy Box

Division can mean sharing equally. Count the total, make equal groups, then check that each group has the same amount.

12 shared into 4 groups

Worked Example

12 counters are shared equally into 3 groups.

Each group has 4 counters.

Division: $12 \div 3 = 4$

A. Warm Up

Start strong! Use the example to help you.

1. Share 10 into 2 equal groups: _____ each

2. Share 15 into 3 equal groups: _____ each

3. Share 20 into 4 equal groups: _____ each

Division Sharing Equally

Year 2 Mathematics | Build, Think and Explain

Name: _____

Date: _____

ACARA v9.0: AC9M2N05 - multiply and divide by one-digit numbers using repeated addition, equal grouping, arrays and partitioning. Supporting: AC9M2N04 - represent problems using number sentences.

B. Build Your Skills

Great thinking! Show your strategy.

1. 18 shared into 3 equal groups = ____ each

2. 24 shared into 4 equal groups = ____ each

3. 30 shared into 5 equal groups = ____ each

4. 16 shared into 2 equal groups = ____ each

C. Word Problem

Ava has 24 stickers. She shares them equally between 6 friends. How many stickers does each friend get?

D. Maths Challenge

Think like a mathematician. Write two different sharing problems that have an answer of 5.

I Can Checklist

- ☐ I can share equally.
- ☐ I can write a division sentence.
- ☐ I can solve a word problem.

Division Sharing Equally - Answer Key

Year 2 Mathematics | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9M2N05 - multiply and divide by one-digit numbers using repeated addition, equal grouping, arrays and partitioning. Supporting: AC9M2N04 - represent problems using number sentences.

Answer Key

- A. Warm Up: 1) 5. 2) 5. 3) 5.
- B. Build Your Skills: 1) 6. 2) 6. 3) 6. 4) 8.
- C. Word Problem: $24 \div 6 = 4$ stickers each.
- D. Answers will vary. Examples: 10 shared into 2 groups = 5; 25 shared into 5 groups = 5.

Parent/Teacher Tip

Use counters or small objects so children can physically share items into equal groups before writing the number sentence.

Extension Idea

Create a sharing story using 30 or fewer objects. Solve it and explain how you checked the groups were equal.
