Part-Part-Whole: Splitting Numbers to 10

Australian Curriculum v9.0 · Year 1
Maths
(Foundation review skill)
AC9MFN04

Back to School 2027 Warm-Up

Name: _____ Date: _____

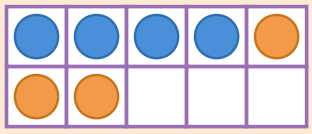

LEARNING INTENTION

I can split a number up to 10 into two parts and put the parts back together.

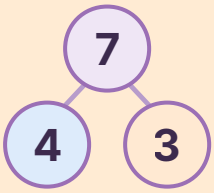

I CAN...

- ✓ split a number into two parts
- ✓ find a missing part
- ✓ make 10 with two numbers

SEE IT: WORKED EXAMPLE

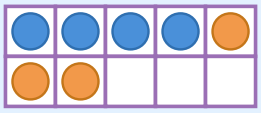

4 blue + 3 orange

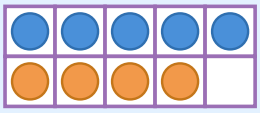

The whole is 7. The parts are 4 and 3.

4 + 3 = 7 3 + 4 = 7 7 − 3 = 4

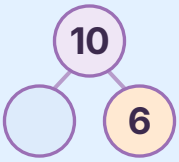

TRY IT TOGETHER

1. 

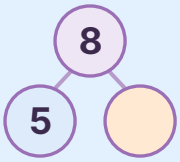

How many of each? ____ + ____ = ____

2. 

How many of each? ____ + ____ = ____

3. 

Find the missing part.

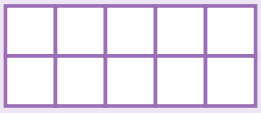

4. 

Find the missing part.

DO IT: MAKE 10

5. 7 + ____ = 10
6. 4 + ____ = 10
7. 9 + ____ = 10
8. 5 + ____ = 10
9. 8 + ____ = 10
10. 2 + ____ = 10

DO IT (CONTINUED)

11 

Show 5 + 2. Colour 5 counters red and 2 counters yellow.
5 + 2 = _____

12 **Split 6 in two different ways.**
_____ + _____ = 6 and _____ + _____ = 6

CHALLENGE: THINK AND EXPLAIN

13 **Story:** Mia has **9 stickers**. Some are stars and some are hearts. She has **4 stars**. How many hearts? Draw or write to show.

14 Ben says, "You can only split 6 as 3 + 3." Is he right? Show another way.

15 What do you notice about **3 + 4** and **4 + 3**? Tell why.

Look Out! The whole is always the biggest number. The two parts together must make the whole.

💡 **Parent Tip:** Use 10 buttons or coins. Hide some under a cup and ask "How many are hiding?" Talk about how the parts fit together.

🎯 My Term 1 Goal: This term I want to get better at _____

Answer and Teacher Page

🎒 Back to School 2027 Warm-Up

Name: _____ Date: _____

ANSWERS

1. 4 + 3 = 7

2. 5 + 4 = 9

3. 4 (4 + 6 = 10)

4. 3 (5 + 3 = 8)

5. 3

6. 6

7. 1

8. 5

9. 2

10. 8

11. 5 + 2 = 7 (5 red, 2 yellow counters)

12. Any two different splits, for example 1 + 5, 2 + 4, 3 + 3, 0 + 6 (and turn-arounds like 5 + 1)

13. 5 hearts (4 + 5 = 9 or 9 − 4 = 5)

14. No. 6 can also be 1 + 5, 2 + 4, 0 + 6 and more.

15. They have the same total (7). The parts can be added in any order.

TEACHER NOTES

Common misconception: thinking each number can be split only one way, or counting all the counters again instead of using the parts.
Support: use real counters on a ten frame. Cover one part and ask “How many are hiding?”
Challenge marking: Q13 accept a drawing, a number sentence or counting on. Q14 accept any correct second split. Q15 look for “same answer” or “the order does not matter”.
Australian Curriculum v9.0: AC9MFN04 (Foundation review): partition and combine collections up to 10 using part-part-whole relationships and subitising to recognise and name the parts.
