

Name: _____

Date: _____

LEARNING TARGET

I can write an argument with clear claims, logical reasons, credible evidence, and a formal conclusion.

KEY STRATEGY + WORKED EXAMPLE

Define a debatable claim, organize reasons, cite credible evidence, explain relevance, address a counterclaim, and maintain formal style.

Prompt: Should middle schools limit disposable plastic bottles on campus? Build an evidence-based argument rather than a list of preferences.

A. TRY TOGETHER - USE THE STRATEGY

1. Name the skill in today's learning target.
2. Underline the words in the model or source that matter most.
3. State the first step of the strategy.
4. Explain what a complete answer must include.

B. CORE PRACTICE - SHOW YOUR WORK

5. Write a precise controlling sentence.

6. Add one relevant reason or fact.

7. Add specific evidence or an example.

8. Explain how the evidence supports the controlling idea.

9. Add a distinct second reason or detail.

10. Use a transition to connect ideas.

11. Acknowledge a question, limitation, or counterpoint.

12. Write an effective concluding sentence.

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. Strengthen the controlling sentence.

14. Replace one vague word with precise vocabulary.

15. Add a concrete detail.

16. Explain rather than list the detail.

17. Improve the transition.

18. Check whether every sentence stays focused.

19. Revise one sentence for clarity.

20. Edit capitalization, usage, punctuation, and spelling.

Name: _____

Date: _____

D. APPLY THE SKILL

21. Complete a full argument with claims and evidence response using at least two details from the source.

22. Evaluate which evidence is strongest for the argument with claims and evidence and justify your choice.

23. Create a new example that uses the same skill, then explain it.

E. REASON, CHECK AND CORRECT

24. Explain why this strategy works and when it is useful.

25. Describe a likely mistake and show how to correct it.

EXIT TICKET + CHALLENGE

26. Apply argument writing with claims and evidence to a new example and explain your evidence or rule.

Challenge: Create a rigorous example of argument writing with claims and evidence, complete it, and justify every decision.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

- A. 1) Skill correctly named. 2) Relevant words identified. 3-4) Answers vary; require the stated strategy and complete-response criteria.
- B. 5-12) Answers vary. Require a debatable claim, logical reasons, credible evidence, explanation, transitions, counterclaim, rebuttal, and formal closure.
- C. 13-20) Answers vary. Require an accurate argument with claims and evidence, relevant evidence or rule, clear explanation, and correct conventions.
- D. 21) Complete response with two relevant details. 22) Strongest evidence should be specific and directly support the argument with claims and evidence: credible waste, cost, recycling, or refill-station evidence connected logically to the claim. 23) New example varies but must transfer the same skill.
- E. 24-25) Answers vary. Require precise reasoning and a corrected example supported by the text or rule.
- EXIT. 26) Teacher checks independent transfer, evidence/rule, explanation, and conventions.
- Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.
- F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may confuse strong opinion with argument. Every reason needs credible evidence and explanation.

TEACHER CHECK

- ☐ Uses an appropriate Grade 6 ELA strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. Have them point to the text evidence or language rule, then revise one response aloud.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
