

Name: _____

Date: _____

LEARNING TARGET

I can cite evidence to support explicit analysis and inferences.

KEY STRATEGY + WORKED EXAMPLE

Make a defensible claim, embed precise evidence, and explain how it proves the claim.

Nora reread the robotics instructions, crossed out two assumptions, and asked the team to test the simplest design first. When it failed, she recorded the result instead of hiding it.

A. TRY TOGETHER - USE THE STRATEGY

1. Name the skill in today's learning target.
2. Underline the words in the model or source that matter most.
3. State the first step of the strategy.
4. Explain what a complete answer must include.

B. CORE PRACTICE - SHOW YOUR WORK

5. State one important fact explicitly given in the source.
6. Determine the inference supported by textual evidence.

7. Select the strongest supporting detail.

8. Explain how that detail supports your answer.

9. Identify a second relevant detail.

10. Distinguish one reasonable inference from one unsupported idea.

11. Explain how the author's word or detail choices develop meaning.

12. Write a concise objective summary of the source.

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. State the inference supported by textual evidence in your own words.
14. Quote or precisely paraphrase one piece of evidence.

15. Embed that evidence in a complete sentence.

16. Explain the logical link between evidence and answer.

17. Write one question answered directly by the source.

18. Write one question requiring an inference.

19. Answer the inference question with evidence.

20. Revise one response using precise academic vocabulary.

Name: _____

Date: _____

D. APPLY THE SKILL

21. Complete a full inference supported by textual evidence response using at least two details from the source.

22. Evaluate which evidence is strongest for the inference supported by textual evidence and justify your choice.

23. Create a new example that uses the same skill, then explain it.

E. REASON, CHECK AND CORRECT

24. Explain why this strategy works and when it is useful.

25. Describe a likely mistake and show how to correct it.

EXIT TICKET + CHALLENGE

26. Apply citing textual evidence to a new example and explain your evidence or rule.

Challenge: Create a rigorous example of citing textual evidence, complete it, and justify every decision.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

- A. 1) Skill correctly named. 2) Relevant words identified. 3-4) Answers vary; require the stated strategy and complete-response criteria.
- B. 5) Nora revises and tests a design. 6) She is methodical/honest/open-minded. 7) She records failure. 8) That shows commitment to accurate evidence. 9) She crosses out assumptions. 10) A claim that she hates robotics is unsupported. 11) Choices reveal scientific integrity. 12) Objective summary varies accurately.
- C. 13-20) Answers vary. Require an accurate inference supported by textual evidence, relevant evidence or rule, clear explanation, and correct conventions.
- D. 21) Complete response with two relevant details. 22) Strongest evidence should be specific and directly support the inference supported by textual evidence: recording failure supports honesty; revising assumptions supports open-mindedness. 23) New example varies but must transfer the same skill.
- E. 24-25) Answers vary. Require precise reasoning and a corrected example supported by the text or rule.
- EXIT. 26) Teacher checks independent transfer, evidence/rule, explanation, and conventions.
- Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.
- F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may insert quotations without analysis. Follow every quotation with reasoning.

TEACHER CHECK

- ☐ Uses an appropriate Grade 6 ELA strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. Have them point to the text evidence or language rule, then revise one response aloud.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
