

Year 2 Reading Comprehension - Weather in Australia

Name: _____ Date: _____

ACARA v9.0 Alignment: AC9E2LY05

Learning Intention

Read an informational text and compare weather in different places.

Reading Strategy

Notice comparison words such as different, warmer, cooler, dry and wet.

Vocabulary Helper

forecast - a prediction about the weather

humid - warm and damp

temperature - how hot or cold something is

Weather in Australia

Australia is a very large country, so the weather is not the same everywhere. On the same day, one town might be hot and dry while another place is cool and rainy.

In northern Australia, some places can feel warm and humid. During the wet season, heavy rain may fall and rivers can rise. People listen to the weather forecast so they can plan safely.

In southern Australia, winter can be cool. Some mountain areas may even get snow. Near the coast, people often feel a sea breeze. Inland places can have very hot days and cooler nights.

Weather affects what people wear, what they do outside and how they care for animals and plants.

Year 2 Reading Comprehension - Weather in Australia

Page 2 - Questions and written response

Warm Up - Circle the type of text.

Story / Information text / Poem

Build Your Skills

1. Why is the weather not the same everywhere in Australia?

2. What can happen during the wet season in northern Australia?

3. Why do people listen to the weather forecast?

4. What may some mountain areas get in winter?

5. Name one way weather affects people.

6. What is one difference between coastal and inland places from the text?

Reading Challenge

Compare two kinds of weather from the text. Use the word different or however.

I Can Checklist

- I read the text carefully.
- I found facts in the text.
- I answered in full sentences.

Teacher Feedback

What went well: _____

Next step: _____

Year 2 Reading Comprehension - Weather in Australia - Answer Key

For teachers, parents and tutors

Warm Up answer: Accept the text type that matches the passage. Information texts should be identified as information texts; stories should be identified as stories.

Detailed answers

1. Australia is very large, so different places can have different weather.
2. Heavy rain may fall and rivers can rise.
3. People listen to the forecast so they can plan safely.
4. Some mountain areas may get snow in winter.
5. Weather affects what people wear, what they do outside, or how they care for animals and plants.
6. Near the coast people may feel a sea breeze, while inland places can have very hot days and cooler nights.

Challenge answer: Answers will vary. Look for a clear idea supported by a detail from the text.

Parent/Teacher Tip

Ask the child to point to the sentence in the passage that helped them answer. This builds evidence-based reading habits.

Extension Idea

Keep a three-day weather diary and write one sentence comparing two days.
