

Adding and Subtracting Decimals

USA Grade 5 Math
CCSS 5.NBT.B.7

Name: _____

Date: _____

LEARNING TARGET

I can add and subtract decimals to hundredths and thousandths.

KEY STRATEGY + WORKED EXAMPLE

Line up decimal points, attach placeholder zeros, compute by place value, and estimate to check.

$$12.4 - 3.75 = 12.40 - 3.75 = 8.65.$$

A. TRY TOGETHER - USE THE STRATEGY

1. $4.75 + 2.8 =$ _____

2. $9.3 - 4.68 =$ _____

3. $12.06 + 7.9 =$ _____

4. $15 - 6.375 =$ _____

B. CORE PRACTICE - SHOW YOUR WORK

5. $3.408 + 5.62 =$ _____

6. $20.1 - 8.95 =$ _____

7. $0.76 + 4.389 =$ _____

8. $18.5 - 9.786 =$ _____

9. $24.075 + 6.8 =$ _____

10. $30 - 12.458 =$ _____

11. $4.75 + 2.8 =$ _____

12. $9.3 - 4.68 =$ _____

C. INDEPENDENT FLUENCY - CALCULATE AND CHECK

13. $12.06 + 7.9 =$ _____

14. $15 - 6.375 =$ _____

15. $3.408 + 5.62 =$ _____

16. $20.1 - 8.95 =$ _____

17. $0.76 + 4.389 =$ _____

18. $18.5 - 9.786 =$ _____

19. $24.075 + 6.8 =$ _____

20. $30 - 12.458 =$ _____

Adding and Subtracting Decimals

USA Grade 5 Math
CCSS 5.NBT.B.7

Name: _____

Date: _____

D. APPLY THE SKILL

21. A runner completes 3.75 miles Monday and 4.608 miles Tuesday. Find the total.

22. A 20-meter ribbon has 7.85 meters cut off. How much remains?

23. A budget has \$45.00; purchases cost \$12.79 and \$8.65. Find the balance.

E. REASON, CHECK AND CORRECT

24. Explain why lining up the last digits instead of decimal points can change the value.

25. Correct: $8.4 - 2.75 = 6.35$.

EXIT TICKET + CHALLENGE

26. Solve $16.08 - 7.695$ and estimate to verify.

Challenge: Create a shopping problem requiring two decimal operations and solve it.

F. STUDENT REVIEW - SHOW WHAT YOU UNDERSTAND

Use your own words so your teacher can see what you understand and what to practise next.

27. Explain one strategy you used today.

28. Check one answer in a different way.

29. Circle one: I understand it | I need more practice | I need help

30. The easiest part was: _____

31. The most difficult part was: _____

Why was it difficult? _____

32. My next practice step is: _____

TEACHER COPY - ANSWERS AND SUPPORT

ANSWER KEY

A. 1) 7.55, 2) 4.62, 3) 19.96, 4) 8.625

B. 5) 9.028, 6) 11.15, 7) 5.149, 8) 8.714, 9) 30.875, 10) 17.542, 11) 7.55, 12) 4.62

C. 13) 19.96, 14) 8.625, 15) 9.028, 16) 11.15, 17) 5.149, 18) 8.714, 19) 30.875, 20) 17.542

D. 21) 8.358 miles. 22) 12.15 m. 23) \$23.56.

E. 24) Decimal points align equal place values. 25) $8.40 - 2.75 = 5.65$.

EXIT. 26) 8.385; estimate $16.1 - 7.7$ about 8.4.

Challenge: Answers vary. Check that the student's example follows every condition and that the reasoning is mathematically correct.

F. 27-28) Answers vary. Look for a clear strategy and a valid second check. 29-32) Use the reflection to identify confidence, difficulty and the next teaching step.

COMMON MISCONCEPTIONS

Students may misalign place values. Rewrite numbers vertically with decimal points aligned and add zeros as placeholders.

TEACHER CHECK

- ☐ Uses an appropriate Grade 5 Math strategy.
- ☐ Shows or explains thinking clearly.
- ☐ Checks a response using evidence, a rule, or a second method.
- ☐ Identifies a specific difficulty and useful next practice step.

PARENT / TEACHER TIP

Ask the child to explain how they know, not only state an answer. If the explanation is unclear, use small objects, a drawing, or a number line before returning to symbols.

NEXT STEP

Revisit the item the child marked difficult. Model one example, solve one together, then ask the child to complete one independently and explain the strategy.
