The School Canteen: Adding and Subtracting Money

Australian Curriculum v9.0 · Year 2 Maths
(Year 1 review skill)
AC9M1N05

🎒 Back to School 2027 Warm-Up

Name: _____ Date: _____

LEARNING INTENTION

I can solve simple money problems by adding to find the total cost and subtracting to find the change.

I CAN…

- ✓ add prices to find the total
- ✓ subtract to find the change
- ✓ show my thinking with a number sentence

CANTEEN PRICE LIST

🍎 Apple	🍉 Fruit cup	🥛 Juice	🥛 Yoghurt	🧁 Muffin	🥪 Sandwich
$2	$2	$3	$3	$4	$5

Worked example: Mia buys a juice ($3) and an apple ($2). Total: 3 + 2 = **$5**. She pays with $10. Change: 10 − 5 = **$5**.

A. TRY TOGETHER – USE THE PRICE LIST

1. Apple + juice = $2 + $3 = _____
2. Sandwich + muffin: $5 + $4 = _____
3. You have $10 and buy a muffin. Change = _____
4. Fruit cup + yoghurt + apple = _____

B. CORE PRACTICE – SHOW YOUR THINKING

5. 2 juices cost _____ altogether.
6. 2 yoghurts and 1 muffin cost _____.
7. You pay $10 for a sandwich. Change: _____
8. Tom has $9 and buys a juice. He has _____ left.

B. CORE PRACTICE (CONTINUED)

🍎 Apple	🍉 Fruit cup	🥛 Juice	🥛 Yoghurt	🧁 Muffin	🥪 Sandwich
$2	$2	$3	$3	$4	$5

9 **Find two items that cost exactly $7 together.** Show the number sentence.

C. CHALLENGE – REASON AND EXPLAIN

10 You have **$10**. Choose **3 different items** to spend as close to $10 as you can without going over. Show your adding.

11 **Error Analysis.** Zoe buys a muffin and an apple and pays with $10. She says, "My change is $16." What did she do wrong? What is her real change?

12 **Make your own problem.** Write a canteen problem for a friend using two items. Write the answer on the back.

Watch Out! Add first to find the total cost. Then subtract the total from the money you paid to find the change.

💡 **Parent Tip:** Let your child be the shopkeeper at home with price tags on a few items and play money. Ask "How much altogether?" and "What is the change?"

🎯 My Term 1 Goal: This term I want to get better at _____

Answer and Teacher Page

Australian Curriculum v9.0 · Year 2 Maths

🎒 Back to School 2027 Warm-Up

Name: _____ Date: _____

ANSWERS

1. $5

2. $9

3. $6 (10 − 4)

4. $7 (2 + 3 + 2)

5. $6 (3 + 3)

6. $10 (3 + 3 + 4)

7. $5 (10 − 5)

8. $6 (9 − 3)

9. Sandwich + apple or fruit cup (5 + 2 = 7), or muffin + juice or yoghurt (4 + 3 = 7)

10. Exactly $10: sandwich + juice (or yoghurt) + apple (or fruit cup), 5 + 3 + 2 = 10. Accept any answer that is $10 or less with correct adding.

11. Zoe added her $10 to the cost instead of subtracting. Cost is 4 + 2 = $6, so change is 10 − 6 = $4.

12. Open response. Check the answer matches the prices.

TEACHER NOTES

Common misconception: adding the amount paid to the cost, or subtracting in the wrong order. Use play money to act it out.
Support: use real or play $1 and $2 coins and count on from the total to the amount paid to find the change.
Challenge marking: Q10 accept any correct combination of 3 different items with total $10 or less (best is $10). Q11 look for adding then subtracting. Q12 check the problem is realistic and solvable.
Australian Curriculum v9.0: AC9M1N05 (Year 1 review): use mathematical modelling to solve practical problems involving additive situations including simple money transactions.
