

Aussie Primary Academy | Australian Curriculum v9.0 | Learn, Analyse and Practise

Name: _____

Date: _____

LEARNING INTENTION	select and navigate texts for a purpose while monitoring meaning and evaluating structural features
KEY IDEA	Efficient readers define the purpose, preview structure, select a pathway, scan strategically and monitor whether the text answers the question. They evaluate whether features genuinely help.
WORKED MODEL	To compare two causes, preview contents and headings, scan the index/glossary for key terms, read relevant sections closely, then verify that evidence answers the question.

SUCCESS CRITERIA - I CAN

[] set a reading purpose [] choose a pathway [] monitor meaning [] evaluate structure

A. NOTICE AND IDENTIFY

1. Match purpose to feature: locate definition/glossary; find topic/index; preview scope/contents; follow section/headings.

2. Choose skim, scan or close read for three different purposes.

3. Explain why a heading can be attractive but unhelpful.

B. APPLY AND EXPLAIN

4. Plan the fastest pathway to find how a cyclone forms in a 12-page report.

5. A webpage has repeated headings and no source links. Evaluate two navigation problems.

6. Write a monitoring question to ask after each paragraph when comparing causes.

C. INDEPENDENT FLUENCY - CHECK AND CREATE

7. Create a navigation map for a textbook spread using entry point, pathway, evidence stop and verification.

8. Revise the map after discovering that the first section does not answer the purpose.

Aussie Primary Academy | Australian Curriculum v9.0 | Independent Application and Self-Review

Name: _____

Date: _____

D. APPLY THE SKILL IN CONTEXT

9. Source A has contents, numbered headings, glossary and index. Source B has search, hyperlinks, menu and captions. Plan a pathway through each to locate one statistic and its explanation.

10. Identify where skimming ends and close reading begins. Justify the switch.

11. Evaluate which source structure better supports comparison, including one limitation.

E. REASON, EVALUATE AND TRANSFER

12. Diagnose: A reader starts at page 1 and reads every word to find one date. Propose and justify an efficient method.

13. Redesign a confusing information page with five structural features. Explain how each supports a distinct reading purpose.

F. STUDENT REVIEW - PROVE YOUR UNDERSTANDING

[] I can navigate and evaluate text structures according to a reading purpose.

Circle one: independently | with one reminder | with support

Evidence from my work that proves I understand: _____

The most difficult decision was _____ because _____

One correction or improvement I made: _____

My next practice step: _____

Aussie Primary Academy | Australian Curriculum v9.0 | Teacher Copy - Answers and Teaching Support

Accept equivalent responses when the student applies the targeted skill accurately and justifies the choice.

COMPLETE ANSWER KEY

1. glossary; index; contents; headings.
2. Preview/main idea=skim; specific detail=scan; analyse evidence=close read.
3. It may be vague, sensational or unrelated to the information beneath it.
4. Preview contents/headings, scan for formation/development, close read relevant section, confirm with diagram/glossary.
5. Repetition obscures hierarchy; missing source links prevent verification. Better labels and references are needed.
6. Example: Does this paragraph add a distinct cause and evidence relevant to my comparison?
- 7-8. Map must respond flexibly when meaning or relevance breaks down.
9. A: contents/index -> page -> heading -> statistic -> surrounding explanation. B: search/menu -> relevant page -> keyword -> caption/link -> source/context.
10. Close reading begins when relevant evidence is located and must be interpreted in context.
11. Either source accepted with feature-based evidence and limitation.
12. Scan index/contents or digital find for the event/key term, then read the surrounding sentence and source.
13. Each feature must have a distinct function, not decorative placement.

TEACHER CHECK AND NEXT STEP

[] Identifies the target feature accurately and cites evidence.

[] Applies the feature independently and explains its effect.

Next step: model one difficult item, complete one together, then repeat independently in a new context.

COMMON MISCONCEPTION / WATCH OUT

Navigation is more than finding a word; readers must verify meaning in context.

More features do not guarantee better structure. Evaluate hierarchy, relevance and usability.

EXTENSION AND RE-TEACH

Re-teach: model one item aloud, complete one together, then ask the student to explain an independent correction.

Extension: transfer the skill to a short authentic text and justify two deliberate language choices with quoted evidence.
