

Addition and Subtraction Strategies

Year 3 Mathematics | Aussie Primary Academy

Name: _____

Date: _____

ACARA v9.0: AC9M3N03 - add and subtract two- and three-digit numbers using place value to partition, rearrange and regroup.

Supporting: AC9M3N02 - recognise and use relationships between addition and subtraction to solve practical problems.

Learning Intention

I can add and subtract two- and three-digit numbers and show my strategy.

Strategy Box

Partition numbers into hundreds, tens and ones. Regroup when needed. Check subtraction with the matching addition fact.

Worked Example

$346 + 128 = 300 + 100, 40 + 20, 6 + 8$. That is $400 + 60 + 14 = 474$.

A. Warm Up

- $46 + 32 = \underline{\hspace{2cm}}$
- $85 - 24 = \underline{\hspace{2cm}}$
- $120 + 50 = \underline{\hspace{2cm}}$

B. Build Your Skills

1. Ava has 238 stickers. Liam gives her 126 more. How many stickers does Ava have now? Number sentence:

2. A class collected 452 cans. They recycled 187 cans on Monday. How many cans are left? Show your working.

3. Use inverse operations to check: $563 - 248 = \underline{\hspace{2cm}}$. Check: $\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

C. Strong Challenge

1. Write your own addition or subtraction word problem with an answer of 315. Solve and explain. _____

I Can Checklist

- ☐ I can choose addition or subtraction.
- ☐ I can show a strategy.
- ☐ I can check my answer.

★ High Five!

You solved problems and checked your thinking - High Five!

Parent Tip - At Home

Play "receipt detective" with pretend prices under \$500. Ask, "Did our shopping total go up or down?" Use silly items like dinosaur socks.

Teacher Tip - In Class

Model one problem using partitioning, then ask students to solve the same problem with a second strategy and compare efficiency.

Teacher Feedback

Strength: _____ Next step: _____

Addition and Subtraction Strategies - Answer Key

Year 3 Mathematics | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9M3N03 - add and subtract two- and three-digit numbers using place value to partition, rearrange and regroup.

Supporting: AC9M3N02 - recognise and use relationships between addition and subtraction to solve practical problems.

Answer Key

Warm Up: 1) 78. 2) 61. 3) 170.

Build: 1) $238 + 126 = 364$ stickers. 2) $452 - 187 = 265$ cans. 3) $563 - 248 = 315$; $248 + 315 = 563$.

Strong Challenge: Answers vary. Example: Grace had 500 points and spent 185. $500 - 185 = 315$.

Parent/Teacher Extension

Ask students to create two problems with the same answer: one addition and one subtraction.
