

Multiplication Tables Practice

Year 3 Mathematics | Aussie Primary Academy

Name: _____

Date: _____

ACARA v9.0: AC9M3N04 - recall and demonstrate proficiency with multiplication facts for 3, 4, 5 and 10 and related division facts.

Supporting: AC9M3N02 - recognise and use relationships between multiplication and division to solve practical problems.

Learning Intention

I can use multiplication facts to solve equal group problems.

Strategy Box

Think equal groups. Use skip counting, arrays or known facts. A division fact can check a multiplication fact.

Worked Example

4 groups of 5 = 20. So $4 \times 5 = 20$ and $20 \div 5 = 4$.

A. Warm Up

1. $3 \times 4 =$ _____

2. $5 \times 6 =$ _____

3. $10 \times 7 =$ _____

B. Build Your Skills

1. Draw or imagine an array for 4×8 . Product: _____

2. There are 5 bags with 9 apples in each bag. How many apples altogether? _____

3. Complete the fact family: $3 \times 7 =$ _____; $7 \times 3 =$ _____; $21 \div 3 =$ _____; $21 \div 7 =$ _____

C. Strong Challenge

1. A classroom has 4 tables. Each table has the same number of chairs. There are 32 chairs in total. How many chairs are at each table? Explain using multiplication and division. _____

I Can Checklist

- ☐ I can use equal groups.
- ☐ I can recall key facts.
- ☐ I can connect multiplication and division.

★ High Five!

You built strong multiplication muscles today!

Parent Tip - At Home

Use snack groups: "If every teddy gets 4 crackers, how many crackers for 5 teddies?" Let one teddy be hilariously greedy.

Teacher Tip - In Class

Use quick arrays with counters. Ask students to say the matching multiplication and division fact aloud.

Teacher Feedback

Strength: _____ Next step: _____

Multiplication Tables Practice - Answer Key

Year 3 Mathematics | Teacher Notes

Name: _____

Date: _____

ACARA v9.0: AC9M3N04 - recall and demonstrate proficiency with multiplication facts for 3, 4, 5 and 10 and related division facts.

Supporting: AC9M3N02 - recognise and use relationships between multiplication and division to solve practical problems.

Answer Key

Warm Up: 1) 12. 2) 30. 3) 70.

Build: 1) 32. 2) $5 \times 9 = 45$ apples. 3) 21, 21, 7, 3.

Strong Challenge: $32 \div 4 = 8$ chairs at each table. Also $4 \times 8 = 32$.

Parent/Teacher Extension

Ask students to invent a multiplication story for 3, 4, 5 or 10 times tables.
